

FIFTEENTH CONGRESS OF THE REPUBLIC)
OF THE PHILIPPINES)
First Regular Session)

SENATE
OFFICE OF THE SECRETARY

10 OCT -5 P3:13

SENATE
S. No. 2556

RECEIVED BY: *ra*

Introduced by Senator Miriam Defensor Santiago

EXPLANATORY NOTE

The Constitution, Article 2, Section 15 provides:

The State shall protect and promote the right to health of the people and instil health consciousness among them.

Obesity is a growing problem around the world. Even though our country has traditionally regarded overweight children as healthy, recent studies have shown that being overweight or obese poses serious threats to our health. Approximately 60 percent of obese children between five and ten years of age have at least one cardiovascular disease risk factor and 25 percent have two or more such risk factors. According to Centers for Disease Control and Prevention in the US, children who are obese are at greater risk for psychological problems such as stigmatization and poor self-esteem. Obese children and adolescents are targets of early and systematic social discrimination. The psychological stress of social stigmatization can cause low self-esteem which, in turn, can hinder academic and social functioning, and persist into adulthood.

This bill provides for means to establish obesity treatment programs across the country by providing grants to establish obesity treatment training for health practitioners.
