Explanatory Note

In the advent of new technologies and inventions, the reinstitution of the Philippine Inventors Commission (PIC) is necessary to cater to the growing needs of Filipino inventors amidst rapid globalization. The need for re-instituting the PIC is very relevant as the role of science and technology becomes more pronounced in economic development worldwide.

Section 10 under Article XIV of the Constitution provides that the State shall give priority to research and development, invention, innovation, and their utilization. Moreover, Section 11 of the same mandates that the State shall grant scholarships, grants-in-aid, or other forms of incentives to deserving science students, researchers, scientists, inventors, technologists, and especially gifted citizens.

Thus, this bill seeks to re-establish the PIC as the lead agency in promoting research and development in the Philippines. This Act shall strengthen the mechanisms for providing the much needed support to Filipino inventors by rationalizing programs for research and development, the manufacturing and marketing of inventive ideas, products, processes and such other areas of technology development. Further, PIC shall provide comprehensive support services to Filipino inventors and shall likewise help protect our countrymen's inventions.

In view of the foregoing, the early passage of this bill is earnestly sought.

ANTONIO "SONNY" F. TRILLANES IV  
Senator
