EXPLANATORY NOTE

The government's efforts to reform the health sector have been set in place through several innovative projects and programs aimed at providing the people with comprehensive health services. The participation of local government units has been tapped to make health care services more affordable and accessible.

However, the fact remains that sophisticated and advanced hospital and medical equipment and facilities are found in highly urbanized cities, so much so that patients from the rural areas have to travel all the way to these urban cities just to avail themselves of advanced medical treatment. The high costs of treatment and the additional travel expenses are financially draining particularly for patients that need treatment on a regular and sustained basis. This is especially true for patients who are suffering from kidney disorder who have to undergo dialysis treatment regularly.

In consonance with the constitutional mandate to make health services available to all the people at affordable cost, this bill requires all national, regional, and provincial government hospitals to establish, operate and maintain a dialysis ward or unit in their respective hospital in order that dialysis treatment will be available and accessible to the people especially those in the rural areas in a cost-effective manner. Moreover, this bill requires that dialysis treatment should be provided to indigent patients, free of charge.

For more efficient delivery of health care services to the Filipino people, the immediate approval of this proposed measure is earnestly urged.

LUISA "LOI" P. EJERCITO ESTRADA
