SENATE
S.B. No. 3510

Introduced by Senator Miriam Defensor Santiago

EXPLANATORY NOTE

The Constitution, Article 13, Section 11 provides that:

The State shall adopt and integrated and comprehensive approach to health development which shall endeavor to make essential goods, health and other social services available to all the people at affordable cost. There shall be a priority for the needs of the underprivileged, sick, elderly, disabled, women and children. The State shall endeavor to provide free medical care to paupers.

As enshrined in our Constitution, a meaningful health development program requires an integrated and comprehensive approach. This means that all our efforts must be coordinated towards addressing all health areas that require solutions and are prime for development. In order to do this efficiently, we must make all relevant information available to all. By doing so, not only do we help prevent unnecessary errors in the diagnosis and treatment of many yet unidentified diseases, we will be able to build on past and present efforts towards better health services and disease prevention. The development of the Internet provides us with a cheap and efficient means through which we can distribute all necessary information that can help our health professionals and patients alike in addressing undiagnosed diseases.

This bill seeks to establish an Undiagnosed Diseases Registry through the Department of Health which shall be made available to the public subject to reasonable information restriction as provided for in this bill and as further determined by the Secretary of Health.
