EXPLANATORY NOTE

The Constitution, Article 2, Section 13 provides that:

The State recognizes the vital role of the youth in nation-building and shall promote and protect their physical, moral, spiritual, intellectual, and social well-being...

Section 15 provides that:

The State shall protect and promote the right to health of the people and instill health consciousness among them.

Statistics show that drowning is a leading cause of death for Asian children. According to Alliance for Safe Children, a child drowns every 15 minutes in some parts of Asia. It calls drowning "a silent epidemic" because the deaths are rarely reported to hospitals.¹

Aid agencies say some of the 300 child deaths caused by floods in Thailand, Cambodia and Vietnam, most from drowning, could have been prevented by raising safety awareness and teaching children to swim.²

Aid workers reportedly say that floodwaters attract children as a place to play, but many do not know about the dangers of currents and water-borne diseases. In addition, children are often left on their own as their parents try to salvage belongings.³

In Netherlands, Belgium, Germany, Austria, France, Sweden, Denmark, Norway and Finland, swimming lessons are included in the school curriculum for children.

In 2011, a Philippine report presented at the World Conference on Drowning Prevention states that "About eight persons die every day due to drowning and that more were reported to be

victims of near drowning (10 cases per day)". According to National Center for Disease Prevention and Control, an attached agency of the Department of Health, children were found to be more at risk of drowning.⁴

According to a United Nations Children's Fund survey, drowning is reportedly the second leading cause of death among Filipino children aged 14 years and below, and the fourth leading cause of death from injury in the Philippines.

The Philippine report also states "the country is often visited by typhoons (average of 20-25 annually) causing floods, flooded areas, flash floods and turbulent seas which undeniably cost the lives of Filipinos."

Thus, there is a need to include swimming lessons in the curriculum of all elementary and secondary schools in the core academic area of Music, Arts, Physical Education, and Health.
