S. No. 1127

RECEIVED BY: *ji*

Introduced by Senator Antonio "Sonny" F. Trillanes IV

EXPLANATORY NOTE

Article XIV, Section 10 of the Constitution declares the essentiality of science and technology in national development and progress. It further states that research, development and its utilization shall be prioritized in view of supporting self-reliant scientific and technological capabilities which can contribute to the country's productive systems.

One of the most remarkable advances science and technology has brought into the light is the Deoxyribonucleic Acid (DNA) technology. This technology has been considered to be a powerful mechanism in determining a person's identity. In countries such as ours, DNA technology has become a useful tool in investigations and establishment of facts to resolve civil, criminal, and other regulatory procedures because of its reliability.

In recognition of the forensic DNA technology's importance, a system of safe storage of the documented results or other relevant data derived from this technology is indispensable.

This bill seeks to establish a Forensic DNA Databank which shall keep and maintain DNA profiles for the purpose of human identification in relation to forensic investigation. This bill also includes the procedures on giving, taking and storing DNA samples that may be used in assisting the recovery or identification of human remains from a disaster or for humanitarian purposes, and identification of living or deceased persons.

In view of the foregoing, the immediate approval of this bill is earnestly sought.

ANTONIO "SONNY" F. TRILLANES IV
