OF THE PHILIPPINES)

SENATE
S. No. 1200

RECEIVED BY: *ji*

Introduced by Senator Miriam Defensor Santiago

EXPLANATORY NOTE

The use of taximeter accelerating devices, as a means of overcharging passengers in taxicabs, is a problem commonly faced by regulatory agencies and the riding public at large. The devices found in taxicabs are typically activated by the driver through the use of a small magnet, hand-held control, or an electronic device, (such as a radio), installed in the taxicab. The devices typically cause additional or false electric pulses to be sent to the taximeter, thereby resulting in increased fares being charged to passengers.

There is no legitimate public purpose for either the possession or use of a meter accelerating device. Such devices perpetuate fraud upon taxicab passengers.

This bill seeks to protect the public from this fraudulent activity.*
