S. No. 657

INTRODUCED BY HON. MANUEL B. VILLAR, JR.

EXPLANATORY NOTE

Recent findings point up the increasing importance of trees in achieving environmental balance. Trees purify the air we breathe: it takes only one a tree to neutralize the carbon dioxide breathed out by a man, a woman and child; 10 trees can neutralize a car's exhaust while 100 trees can neutralize a truck's exhaust.

It is in the light of such findings that we have crafted this Bill which seeks, in effect, to make open spaces in human settlement sites as "breathing spaces." As a sea diver wears a self-contained underwater breathing apparatus or scuba diving equipment, plants and trees in our surroundings provide the equivalent self-contained terrestrial breathing apparatuses.

This bill seeks to require the planting of trees in open spaces of residential subdivisions amending Section 31 of P.D. No. 1216. Also, the Bill provides that "no subdivision project shall be approved without the inclusion of a tree-planting program in its plans."

Subdivisions are mushrooming in various parts of the country. As rawlands with their stock of wild plant growth are bulldozed and transformed into subdivisions sites, the consequent utilization of land leaves lasting impact on a locality's environment. Sound site development and planning requires environmental renewal and protection.

As we instill among the people the need to protect and restore our much-abused environment, let us also do our share no matter how modest in ensuring our ecological balance in housing and human settlement sites.

For such reasons, immediate passage of the Bill is earnestly requested.
