#### EXPLANATORY NOTE

Presidential Decree No. 910 mandated the creation of the Malampaya Fund for the purpose of financing *"energy resource development and exploitation programs and projects of the government."* The Malampaya Project is "a joint undertaking of the Philippine national government and the private sector spearheaded by the Department of Energy (DOE) and developed and operated by Shell Philippines Exploration B.V. (SPEX) on behalf of joint venture partners Chevron Malampaya LLC and the PNOC Exploration Corporation.<sup>1</sup> The Malampaya Fund is derived from the proceeds of the Malampaya natural gas project off the coast of Palawan province that was started in 2001 with a current balance of P137.288 Billion, as recently confirmed by the Bureau of Treasury.

Contrary however to the spirit of the law, during the previous administration, said Fund was allegedly siphoned off to finance anomalous transactions such as those involving dubious Foundations linked to Mrs. Janet Lim-Napoles, which resulted to a loss of 900 Million pesos due to ghost deliveries of goods for projects under the government. Said circumstance invited outrage from the citizenry and prompted the High Court to clip the discretionary powers of the President to touch the huge fund although it affirmed the constitutionality of utilizing the same insofar as energy resource development and exploitation programs and projects of the government are concerned.

Aforesaid ruling, however, puts the President into a quandary on when he is allowed to tap the Fund. Case in point is the President's uncertainty whether he can use said Fund as subsidy for the direct benefit of electric end-users to minimize the financial brunt of the impending power hike of the largest power distributor in the country.

It is, thus, incumbent upon Congress to promote public interest by once and for all amending the more than three-decade old law. It is against this backdrop that this measure seeks to revise said law by expressly authorizing the use of the Special Funds which include the Malampaya Fund to finance the maintenance, rehabilitation, and replacement of energy infrastructure in preparation for and in response to natural and man-made calamities as well as to finance direct subsidy for energy consumption by end users in case of market failure.

In view of the foregoing, immediate passage of this measure is earnestly sought.
