EXPLANATORY NOTE

The coconut industry is a top dollar earner chalking \$900 million to about \$1 billion, and a potential annual earner of \$2 billion if rehabilitated. As a dollar earner, the coconut and all its by-products surpass other export products, as it requires no import casts. In fact, the Philippines is one of the world's biggest exporters of coconut oil, which is either used for food or other industries.

Unfortunately, unstable trends in production and world market prices lead observers to view the industry as a sunset industry, which will eventually die and stop bringing income to those who depend on it for a living. The number one problem is the dwindling supply of coconuts. Coconut trees are cut down for lumber, while some cocolands are being converted to avoid the operation of land reform. Thus, the marginal coconut farmer is now in quandary. Most of them are seriously thinking of selling their cocolands, or of converting it, and leaving coconut farming in favor of promising opportunities in other areas of endeavor. Hence, it is incumbent upon Congress to address these conditions afflicting the coconut industry, which comprises a substantial sector of Philippine agriculture and a major source of our export earnings.

This bill seeks, therefore, to alleviate the present condition of the coconut industry and ensure its continuity and sustainability by classifying it as last priority for coverage in the Comprehensive Agrarian Reform Program of the government so as not to discourage coconut farmers in investing further in coconut farming. This measure also provides for a stricter or higher penalty for violations of the prohibited acts and omissions under Republic Act. No. 6657.

Early approval of this bill is earnestly requested.
