EXPLANATORY NOTE

With the election of the Sanggunian Kabataan last December 4, 1992, there is now in every barangay of the country a potent force which can be tapped to implement various projects and programs of government.

Among these projects and programs is on environmental protection through tree planting or "greening" activities and solid waste disposal projects, which are of urgent importance and necessity not only in urban centers but also even in the farthest barangay of the country.

The Local Government Code of 1991, while vesting in the Sanggunian Kabataan (SK) the authority to promulgate resolutions necessary to carry out the objectives of the youth and to coordinate with the appropriate national agency for the implementation of youth development projects and programs in the national level, the same Code does not specifically mandate the SK the power to implement projects and programs related to environmental protection such as tree planting activities and solid waste disposal in their respective barangays.

This legislative measure seeks to fill in that gap and mandates the SK to implement tree planting and solid waste disposal programs in coordination with the Department of Environment and Natural Resources and the local government units concerned. This bill also provides for the mechanism by which the programs can be effectively implemented.

If only to maintain our country's natural resources and prevent its further pollution and deterioration, the approval of this bill is urgently requested.
