EXPLANATORY NOTE

The Constitution, Article 2, Section 24, provides:

The State recognizes the vital role of communication and information in nation-building.

The arrival of the cellular phone in the early 1980s was a turning point in telecommunications. For the first time, people made and received telephone calls without being tied to a specific location.

Cellular phones have become an essential part of many Filipinos lives with the number of cellular phone users increasing daily. However, cellular phones companies have failed to cope with the increasing demand for cellular phone services, and National Telecommunications Commission has received numerous complaints on poor services by these companies.

Hence, this bill seeks to establish minimum standards regarding the quality of wireless telephone service and to monitor complaints regarding such service.
