S. B. No. **511** 

TECSIVED BY:

Introduced by Senator Miriam Defensor Santiago

## **EXPLANATORY NOTE**

The Constitution, Article 2, Section 17, provides:

The State shall give priority to education, science and technology, arts, culture and sports to foster patriotism and nationalism, accelerate social progress, and promote total human liberation and development.

Teachers should be provided with the tools and time required to master a variety of technological skills, redesign their lesson plans around technology-enhanced resources, and take on a complex new role in the technologically transformed classroom.

Unfortunately, teachers receive little support for these fundamental changes, and many are left largely on their own as they struggle to integrate technology into their curricula.

It is necessary and appropriate that our secondary and elementary teachers are afforded these opportunities in order to fulfill our commitment to providing every child with a high quality education. Otherwise, the technological transformation of our schools will go to waste.

Hence, this bill seeks to provide computer innovative assistance training programs to elementary and secondary teachers.
