

THIRTEEN CONGRESS OF THE PHILIPPINES
OF THE PHILIPPINES
First Regular Session

04 JUL 28 AM 1:21

S. B. No. 1539

RECEIVED BY: _____

Introduced by Senator Magsaysay, Jr.

Explanatory Note

Agriculture accounts for a fifth of the country's gross domestic product (GDP), about 14 % of total exports, and employs 44 % of the total labor force. The significance of agriculture is mirrored in the fact that it means food sufficiency. As such, as the very backbone of the country's economy, it requires substantial support.

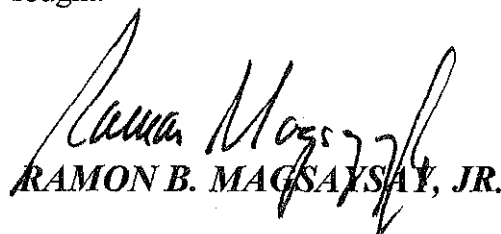

The same is the very essence of this legislation. The bill ensconced the policy that the State shall ensure food security for all Filipinos, protecting farmers income, creating an environment that is conducive to market-based development, ensuring sufficient supply of staple food for domestic consumption and relief operations, and motivating farmers to increase their productivity and competitiveness. Likewise, the bill is aimed at ensuring the stability of both supply and prices of staple food.

These the legislation wants to achieve through the reengineering of the National Food Authority by establishing a National Food Corporation and the Food Development and Regulatory Administration.

Among the rationalizations supporting the enactment of the bill are as follows:

- To provide rice farmers initially with a market for their palay and eventually the skills to market their own produce at remunerative prices;
- To encourage the adoption, in the processing and marketing phases, of such proven systems as will reduce costs and improve the quality of food grains and thereby bring about ultimately reasonable prices within the reach of the great masses of the people;
- To encourage private sector participation in the country's food security and price stabilization programs;
- To streamline government intervention in the rice sector so that these are effective and efficient;
- To promote transparency in the costs of government interventions to stabilize rice supplies, stabilize palay farm gate prices, and subsidize rice for the poor;
- To focus government price subsidies to disadvantaged families.
- To promote developmental regulations aimed at enhancing competitiveness, transparency, and responsibility in the food grains marketing industry;

Early approval of this legislation is earnestly sought.

RAMON B. MAGSAYSAY, JR.
