

THIRTEENTH CONGRESS OF THE REPUBLIC)
OF THE PHILIPPINES)
First Regular Session)

SENATE
S.B. No. 1810

RECEIVED BY 

Introduced by Senator Miriam Defensor Santiago

EXPLANATORY NOTE

Recent scientific reports by the United States Institute of Medicine, the American Medical Association and the Office on National AIDS Policy stress the need for sexuality education that includes messages about abstinence and provides young people with information about contraception for the prevention of teen pregnancy, HIV/AIDS and other sexually transmitted diseases ('STDs').

Research shows that teenagers who receive sexuality education that includes discussion of contraception are more likely than those who receive abstinence-only messages to delay sexual activity and to use contraceptives when they do become sexually active.

Comprehensive sexuality education programs respect the diversity of values and beliefs represented in the community and will complement and augment the sexuality education children receive from their families.

Filipino teens need access to full, complete, and medically and factually accurate information regarding sexuality, including contraception, STD/HIV prevention, and abstinence.
