AN ACT
PROVIDING FOR A JUST AND HUMANE PUBLIC UTILITY VEHICLE (PUV) MODERNIZATION PROGRAM, WITH TRANSITORY "ASSISTANCE AND SERVICES RENDERED TO PUV DRIVERS, OPERATORS AND STAKEHOLDERS, APPROPRIATING FUNDS THEREFOR, AND FOR OTHER PURPOSES

Explanatory Note

Most frustrated commuters and drivers would attribute the decline of the jeepney to some cultural vice. Some would say that the jeepney is the result of the Filipino's lack of discipline; others would say that it is the product of a tendency towards "pwede na" solutions. And others would share the sentiment of Nick Joaquin: the jeepney is just another variation of our "heritage of smallness", or our tendency to hide behind small comforts in the face of large problems.¹

These critiques overlook the fact that the story of the jeepney and its decline is inextricable from mismanagement of transport development in the country. It is the story of a temporary policy which remained frozen in time.

The jeepney emerged from the rubble of World War II.² Before the war, a system of streetcars known as Tranvias³ transported residents of Manila and its suburbs. The bombing of Manila during the war eradicated the Tranvia and left a gaping hole in the city's transport system. To fill the void, ingenious Filipinos repurposed surplus U.S. Army Jeeps in Manila's transport system. The jeeps were modified to suit their new role as well as the Filipino palette: metal roofs and parallel benches were installed, and the "army green" was replaced with more vibrant colors.⁴ An entire industry catering to the production, modification, and maintenance of jeepneys emerged.

¹ Joaquin, N. "A Heritage of Smallness"
⁴ Fernandez, R. "Jeepney, icon of Ph transport, evolves" Sun Star Cebu (19 December 2018).
Over time, economic and demographic growth caused Manila to expand. It sprawled in every direction, eventually spilling over into the adjacent provinces of Cavite, Laguna, Rizal, and Bulacan. Since appropriate rail-based mass transit was not established, there was an exponential increase in the number of private vehicles. Fares on buses and jeepneys were kept low to cater to the commuters who could not afford to buy their vehicles. In turn, the low fares (plus the oppressive boundary system) prevented jeepney drivers and operators from ever upgrading their vehicles.

Due to the policy trajectory above, the "King of the Road" has become the "King of Decline". Most jeepneys lack basic security features other than handrails. Failing brakes are a common cause of accidents. Bald tires are ubiquitous. Their toxic, noxious emissions are endemic to Manila's atmosphere. Yet jeepneys (and buses) continue to account for 70% of all person-trips in Metro Manila.

For the sake of our commuters, modernizing the jeepney is a necessary endeavour. Efforts to do so have existed since 1992. Some prominent examples include President Fidel V. Ramos' directive to DOTC Secretary Jesus Garcia Jr. to "...initiate moves that will lead to the eventual phase out of jeepneys"; The Aquino administration's "PUV Rationalization Program", which launched in 2015. The Duterte administration's "PUV Modernization Program" (PUVMP) is part of the decades-long effort to bring the Jeepney to the modern age.

Yet modernizing the jeepney is also a perennial source of conflict- a heavyweight boxing match between policy makers and jeepney drivers which never seems to end. Tilt the scales in one way, and the entire effort to modernize the jeepney screeches to a halt. Tilted the scales the other way, and the close to 200,000 jeepney drivers and operators lose their only source of livelihood.

This present measure proposes a middle ground. It seeks to establish a "Just and Humane PUV Modernization Program" which will balance the need for a safer, more environmentally-sound public transport with the rights of those whose livelihood depends on this. Under this program, jeepneys shall only be required to replace their engines to make them Euro 4 compliant. To lighten the capital burden, the government shall provide financial assistance which shall not be less than 10% of the price per unit. The interest rate on loan amortization shall not exceed 4% diminishing annual interest considering the mass/public nature of PUV services, and the loan amortization period shall be at least fifteen (15) years.

In view of the foregoing, immediate approval of this measure is eagerly sought.

AN ACT
PROVIDING FOR A JUST AND HUMANE PUBLIC UTILITY VEHICLE (PUV) MODERNIZATION PROGRAM, WITH TRANSITORY ASSISTANCE AND SERVICES RENDERED TO PUV DRIVERS, OPERATORS AND STAKEHOLDERS, APPROPRIATING FUNDS THEREFOR, AND FOR OTHER PURPOSES

Be it enacted by the Senate and House of Representatives of the Philippines in Congress assembled:

Section 1. Short Title. – This Act shall be known as the "Just and Humane Public Utility Vehicles Modernization Act."

Sec. 2. Declaration of Policy. – It is hereby declared the policy of the State, in accordance with the Constitution, that the right to travel shall not be impaired, be it due to lack of means, access, or capability to pay of the general public. Public transportation and mobility, therefore, is a sector that should be developed, modernized and sustained by the State based on principles of justice, equity and ecological sustainability.

At the same time, the State acknowledges the transportation sector as both public service and enterprise. As an enterprise employing labor, deemed by law as the primary social economic force, the State must protect the rights of workers within the transportation service industry and promote their welfare. Towards this end, the State shall encourage the creation of a people-centered strategy that represents the core of economic and social development. It therefore ensures that the transportation sector develops and modernizes not just technologically, but also
in accordance with principles of justice and equity, promoting full, productive
employment and decent work for all.

Sec. 3. Objectives. — This Act shall have the following objectives:
(a) To make public land transportation safer, more comfortable, and
environmentally sustainable for the riding public through the
modernization of Public Utility Vehicles (PUVs) while ensuring that the
security of tenure of long-standing drivers in the PUV industry will be
protected and that their right to work until retirement will not be
compromised;
(b) To provide a means of support to drivers who can no longer take part
in the PUV sector due to various reasons, including those who choose
to pursue work in a different sector and thus require retraining and
reskilling; and
(c) To guarantee genuine and fair competition, and a level playing field
within the PUV sector.

Sec. 4. PUV Modernization Program (PUVMP). — A PUV Modernization
Program, herein referred to as “the Program” is hereby established in order to
enhance the safety, efficiency and sustainability of public ground transportation. The
Department of Transportation (DOTr), in consultation with other concerned agencies
and stakeholders, shall develop and promulgate guidelines and policies for the
phased transition from the current PUVs to standards-compliant vehicles. The DOTr
shall also provide for consultation and policy-making spaces through which
stakeholders in the process can provide recommendations and reform options to
DOTr and other relevant government agencies.

Sec. 5. Engine and Replacement Specification. —
(a) PUVs tested and proven to be road-worthy by the DOTr and
Department of Trade and Industry’s Bureau of Philippine Standards
(DTI-BPS) shall only be required to have engines replaced to be Euro 4
compliant;
(b) The remaining budget under DTI’s Comprehensive Automotive
Resurgence Strategy (CARS) program shall be used to incentivize and
support the creation and assembly of locally manufactured PUV units and parts;

(c) Only emission testing centers duly authorized by the DTI, and which follow the standards set by the Department of Environment and Natural Resources (DENR) and DOTr shall be used in registering PUVs in regular emission testing; and

(d) DOTr shall plan for a phased implementation of the program following a five (5) year transition period.

Sec. 6. **Financial Assistance.** –

(a) Government Subsidy - Government financial assistance provided to drivers/operators who elect to modernize shall not be lower than 10% of the price per unit to lighten the capital burden of modernization.

(b) Loan Interest/Payment Options

i. A tripartite mechanism involving government, financing institutions and PUV operators/owners shall be established to set policies for the loan program and other issues on implementation. Loan requirements shall be simplified and tailored to the current situation and standing of PUV drivers and operators.

ii. The interest rate on loan amortization shall not exceed 4% diminishing annual interest considering the mass/public nature of PUV services.

iii. The loan amortization period shall be at least fifteen (15) years; subject to re-computation once a driver/operator decides to shorten the said period or is able to pay in full before its maturity: *Provided,* that the total cost of the monthly amortization shall be proportional to the monthly income of a PUV driver or operator.

Sec. 8. **Compensation Option.** – A driver who can no longer take part in the PUV sector due to the Program shall be given a reasonable amount of financial assistance to enable them to venture into other forms of livelihood.
Sec. 9. **PUV Sector Competitiveness Enhancement.** – To prevent unwanted competition between drivers and operators planning on operating in the same area, a "first usage"/"first presence" policy shall be implemented. Long term existing/residential operators/drivers within a particular area shall be given priority in route assignment.

Sec. 10. **Appropriations.** – The equivalent of twenty percent (20%) annual share on of the total gross collections of the Motor Vehicle User's Charge (MVUC) collected pursuant to Republic Act No. 8794, as amended, shall be utilized to fund this Act. The amount shall be indicated as a separate line item under the budget of the DOTr in the annual General Appropriations Act (GAA).

Sec. 11. **Implementing Rules and Regulations.** – The Secretary of the Department of Transportation, in consultation with other relevant government agencies and transport sector groups, shall issue the rules and regulations necessary for the effective implementation of this Act within sixty (60) days of its effectivity;

Sec. 12. **Separability Clause.** – If for any reason, any part or provision of this Act is declared invalid or unconstitutional, the remaining parts or provisions not affected thereby shall remain in full force and effect.

Sec. 13. **Repealing Clause.** – All laws, executive orders, presidential decrees, rules and regulations or parts thereof contrary to or inconsistent with any provisions of this Act are hereby repealed, amended or modified accordingly.

Sec. 14. **Effectivity.** – This Act shall take effect fifteen (15) days after its publication in the Official Gazette or in two (2) national newspapers of general circulation.

Approved,
