**AN ACT
MANDATING THE LANGUAGE ACCESSIBILITY OF DISASTER-RELATED
INFORMATION**

EXPLANATORY NOTE

During disasters and other emergency situations, an informed public is a prepared and ready public. Giving our constituents with easily-understandable, up-to-date and reliable information is a crucial aspect of any disaster preparedness and response plan. Unfortunately, some of the government's announcements, bulletins and advisories regarding impending disasters or calamities fall short of this objective. Most, if not all, are confined only to the use of the English language; or, if ever they are translated, it is only to the Filipino language and not to the many other regional languages and dialects that our citizens speak, write and converse with.

This bill aims to put an end to this practice. Under this bill, it shall be required for all government agencies and local government units to convert in an easily understandable form and translate to Filipino and any other appropriate regional language or dialect all their announcements, advisories, press releases, issuances and any other information relevant to a local or national disaster or emergency. The translation of the information shall be to (1) Filipino and (2) other regional language/s or dialect/s, as deemed necessary by the government agency and local government unit concerned considering the geographical location of the affected communities and the intended recipients of the information. The translated information shall be disseminated as widely as possible through all available media and communication channels.

Through this proposed measure, all disaster-related information shall be language-accessible and readily-comprehensible especially to speakers of our regional languages and dialects.

In view of this, early passage of this bill is sought.
