AN ACT

STRENGTHENING THE NATIONAL PROGRAM FOR THE ELIMINATION OF TUBERCULOSIS, AMENDING FOR THE PURPOSE REPUBLIC ACT NO. 10767 OR THE "COMPREHENSIVE TUBERCULOSIS ELIMINATION PLAN ACT

EXPLANATORY NOTE

In the 2022 Global Tuberculosis Report, the World Health Organization (WHO) noted that the "COVID-19 pandemic continues to have a damaging impact on access to TB diagnosis and treatment and the burden of TB disease".

It was also reported that "progress made in years up to 2019 has slowed, stalled or reversed, and the global TB targets are off track".

In the same report, the Philippines figured prominently among the major contributors to the global increase in TB incidence between 2020 and 2021. It is also identified among the top five countries contributing to the global gap between estimated TB incidence and the reported number of people newly diagnosed with TB. And notably, the Philippines joined the list of 30 countries with a high incidence of TB cases among people living with HIV (PLHIVs).

Similarly, for 2021-2025, the WHO included the Philippines in the three global high-burden country (HBC) lists since it has the highest estimated numbers of (a.) incident TB cases; (b.) incident TB cases among people living with HIV; and (c.) incidents of multidrug-resistant/rifampicin-resistant TB.

And within the WHO Western Pacific Region, the Philippines was given particular attention as among the seven priority countries out of a total of 36 countries and territories, where progress is most needed to achieve the targets set in WHO's End TB Strategy, a political commitment made in 2018 and in line with the 2030 Sustainable Development. Goals.

Given these contexts, there is a need to intensify efforts to mitigate and reverse the negative impact of the COVID-19 pandemic on TB and to fulfill our commitment to eliminate TB as a public health problem in the country.

As a policy response, this bill seeks to amend Republic Act 10767, otherwise known as the "Comprehensive Tuberculosis Elimination Plan Act", as a counterpart measure of the proposal passed in the House of Representatives during the 18th Congress.

Consistent with the intent to strengthen an integrated patient-centered TB healthcare service delivery and universal healthcare, the bill provides for the diagnosis and treatment of TB, a collaborative and multi-sectoral approach to TB response, and promotive and preventive actions to eliminate TB.

Also central to this proposal is the commitment to mainstream a rights-based approach in the country's national TB response and to enable the participation and involvement of communities, civil society, patients organization, and TB survivors.

In view of the foregoing, the passage of this measure is earnestly sought.
