SENATE

RECEIVED BY: 

Senate Bill No. 434

INTRODUCED BY SEN. JINGGOY EJERCITO ESTRADA

EXPLANATORY NOTE

The 1987 Constitution provides, among others, that "the State shall adopt an integrated and comprehensive approach to health development which shall endeavor to make essential goods, health and other social services available to all people at affordable cost."

Drugstores are normally non-existent in *barangays* outside of the town proper and most of our people in the countryside are deprived of access even to basic drugs and medicines when they are afflicted and in need.

This bill, by institutionalizing the Botica sa Barangay Program, should provide the answer to this basic need of our people in the countryside. Within a period of three (3) years, the Department of Health is enjoined to establish drugstores in every *barangay* so as to make available drugs and medicines for common illnesses such as fever, pain, cough, colds, and others, including vitamin and mineral preparations.

Eventually, the list of drugs could be expanded to better respond to the needs of every *barangay* and community in the country.

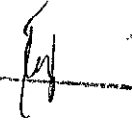

Originally filed in the 12th Congress but failed to be enacted into law, this representation strongly believes that since the delivery of health services is one area where the government has long been inefficient and ineffective, the immediate passage of this bill is earnestly sought.
