OFFICE OF THE SECRETARY

SENATE

S. No. 2291

RECEIVED BY: 

Introduced by Senator Miriam Defensor Santiago

EXPLANATORY NOTE

Dignity is valued in our society. The Constitution, in Article 2, Section 11 states that it values the dignity of every human person and guarantees full respect for human rights.

With this value in mind, the Rules on evidence even disqualify certain persons from testifying in court by reason of privilege communications to protect the dignity of individuals. Health personnel are one such group of individuals who cannot in a civil case, without the consent of the patient, be examined as to any advice or treatment given by him or any information which he may have acquired in attending such patient in a professional capacity, which information was necessary to enable him to act in capacity, and which would blacken the reputation of the patient.

Even with the protection given under the law, there are still instances where a patient's dignity and privacy are violated. Most of these violations happen inside the surgery or operating room where the patient is unable to prevent people from watching the operation because he or she is unconscious.

This bill aims to give the surgical patient additional protection from individuals who violate his right to privacy and dignity inside the operating room during surgery when he is most vulnerable.
