SENATE
S. No. 2305

RECEIVED BY: GA

Introduced by Senator Antonio "Sonny" F. Trillanes IV

EXPLANATORY NOTE

Information and Communications Technology (ICT) is a vital tool in the development of an electronic society. Being connected digitally provides us with easy access and fast links, thus, making the use of ICT highly essential to our economic growth, educational advancement, awareness enhancement, market facilitation, and public participation.

This bill proposes the creation of 81 nodes nationwide situated in areas that are development corridors in order to pump prime economic activities and promote development in other growth areas of the province. It hopes to minimize the so-called digital divide as well as speed up the setting up of a wireless communications infrastructure.

With ICT Hubs, provinces will be able to harness their potentials in terms of making their provinces investor friendly. It is expected that they will electronically promote the provinces and provide nerve centers to connect the same to the various agencies of the national government thereby pushing the growth of eGovernment locally and nationally. More importantly, with these Hubs, the archipelagic feature of the country can be bridged electronically thereby creating "One Philippines."

As declared in Article 11 Section 24 of the Constitution, "The State recognizes the vital role of communication and information in nation-building." Therefore, it is in pursuance of this policy and the consideration of the above premises that the passage of this bill is earnestly requested.

ANTONIO "SONNY" F. TRILLANES IV
