**EXPLANATORY NOTE**

The State recognizes the importance of the disabled sector. For example, it established the National Commission for Disabled Persons to ensure that the rights of the handicapped are protected, and that all programs and services are universal and accessible to all segments of society.

Although modern technology has created devices to cater to the special needs of handicapped persons, they still need assistance with communication facilities for the hearing-impaired and speech-impaired.

This proposed measure seeks to make the national telecommunication system available to the hearing-impaired and speech-impaired.

The early passage of this proposed measure is highly recommended.
