REPUBLIC OF THE PHILIPPINES)

S. No. 2552

Introduced by Senator Manny Villar

EXPLANATORY NOTE

Republic Act 8550 otherwise known as the Philippine Fisheries Code of 1998 was passed into law in pursuit of the State's policy to protect the country's marine wealth in its archipelagic waters and reserve its use and enjoyment exclusively for Filipinos. However, amendments to certain provisions of the law must be undertaken in order to prevent the apparent threat in the survival of our rare and endangered marine species. And further, to make certain that our government adheres and adapt to the covenants made in international conventions that we are a part of.

The trade in wild animals and plants crosses borders between countries, and the effort to regulate it requires international cooperation to safeguard certain species from over-exploitation. It is in the spirit of this cooperation that the Convention on International Trade of Endangered Species of Flora and Fauna or CITES was conceived. This is the covenant by which our country is bound as a party and signatory thereof. In order to ensure our adherence to and implement the principles provided under CITES at the national level, this bill is thus proposed.

This measure aims to impose stiffer penalties by increasing the fines and imprisonment to persons who violate or practice illegal trade of our marine resources. More importantly those that are listed as rare, threatened or endangered under CITES, the International Union for Conservation of Nature and Natural Resources (IUCN) and those species mentioned under Republic Act No. 9147 or the Wildlife Resources Conservation and Protection Act.

Henceforth, the immediate enactment of this bill is earnestly sought.

MANNY VILLAR
