**EXPLANATORY NOTE**

Our government works in a system of bureaucracy. In a bureaucracy, the executive branch of the government is divided into sections known as the Department. Each department has its own specific role, task and a sector of our country to attend to. In recent years, there has been a demand for the efficiency and productivity of our government sectors due to economic crisis.

Executive Order No. 546 created the Ministry of Transportation and Communication which was later on renamed to Department of Transportation and Communication. The DOTC is tasked with policy, planning, programming, coordinating, implementing, regulating and administrative entity of the executive branch of government in the promotion, development, and regulation of a dependable and coordinated network of transport and communication systems in the country.

To better serve the people, devolution of powers within the ranks of the DOTC is needed. This bill proposes the separation of the DOTC into two more specific departments to be known as the Department of Transportation (DOT) and the Department of Communication (DOC). Through the proposed separation of the DOTC, each of the Transportation and Communication sectors would be served more efficiently and effectively.

In light of the foregoing, approval of the proposed separation of the Department of Transportation and Communication into the Department of Transportation and the Department of Communication is earnestly sought.
