

FIFTEENTH CONGRESS OF THE
REPUBLIC OF THE PHILIPPINES
First Regular Session

OFFICE OF THE SECRETARY

JUL 12 1970

SENATE

Senate Bill No. 1165 RECEIVED BY 

INTRODUCED BY HON. MANNY VILLAR

EXPLANATORY NOTE

Prostate cancer is now one of the leading causes of death among Filipino males. Statistics show that about 25 percent of men afflicted with prostate cancer die ultimately. Patients who survive the cancer still require treatment to ease symptoms such as pain, bleeding and urinary obstruction.

The American Cancer Society and the American Urological Association recommend that men forty (40) years or older undergo periodic testing for the early detection of prostate cancer. Early detection will prevent future disease progression. Also, treatment in the early stages of cancer is less than when done in its advanced stages.

This bill seeks to establish a program to educate the public and increase awareness on prostate cancer.
