EXPLANATORY NOTE

The Constitution, Article 2, Section 20 provides that:

SEC. 20. The State recognizes the indispensable role of the private sector, encourages private enterprise, and provides incentives to needed investments.

Throughout our history, the Philippines as a nation has been blessed by great minds. All over the world, countless Filipinos have won and have continually been recognized for their ingenuity. However, we currently do not have a solid program to recognize the achievement of our countrymen in research and development here in our country. Unfortunately, our inventors and innovators had to look elsewhere to gain recognizion. This leads to our inventions being claimed by the foreign countries that recognized them.

We need to establish a recognition program that will encourage our inventors and innovators to develop new products and technologies that can be produced and exported from our country. This would not only help our economy, but would once again give our local minds their due for their countless achievements in the field of research and development.

This bill seeks to mandate the Department of Trade and Industry to establish a National Innovation Prizes Board who shall spearhead a program to solicit participation from various sectors of our country, encourage a competitive research and development drive and recognize and reward the best new inventions and innovations of our countrymen.¹
