

FIFTEENTH CONGRESS OF THE REPUBLIC )  
OF THE PHILIPPINES )  
First Regular Session )

OFFICE OF THE CLERK

JUL 21 2012

SENATE  
S. No. 1900

Introduced by Senator Miriam Defensor Santiago

### EXPLANATORY NOTE

The Constitution, Article 11, Section 16 provides that:

The State shall protect and advance the right of the people to a balanced and healthful ecology in accord with the rhythm and harmony of nature.

The Philippines is facing growing environmental problems, such as global climate change, waste disposal, and air and water pollution. As such, Filipino consumers are willing to pay more for environment-friendly products. Environmental marketing claims convey information about products and influence purchasing decisions. Conveying accurate and reliable environmental information in environmental marketing claims will be of great use to the consumers, willing to change their purchasing patterns. However, environmental marketing claims are largely unregulated and can sometime be deceptive.

This bills seeks to: (1) prevent the use of fraudulent, deceptive, and misleading environmental marketing claims; (2) establish uniform, accurate standards and definitions that reflect the best available manufacturing practices, products, and packaging; and (3) encourage both consumers and industry to adopt habits and practices that favor natural resource conservation and environmental protection.<sup>1</sup>
