

FIFTEENTH CONGRESS OF THE)
REPUBLIC OF THE PHILIPPINES)
First Regular Session)

10 JUL 27 P434

SENATE
S. No. 2163

RECEIVED BY: 

Introduced by Senator FRANCIS G. ESCUDERO

EXPLANATORY NOTE

This bill proposes to professionalize the practice of pharmacy by setting a national standard for the profession, likewise creating a professional regulatory board to ensure excellent, globally competitive, and accountable practice of the same.

Pharmacy as a health profession links the health sciences with the chemical sciences and is charged with ensuring the safe and effective use of pharmaceutical drugs. The scope of the pharmacy practice involves traditional roles such as compounding and dispensing medications, but also includes more modern services related to health care, including clinical services, reviewing medications for safety and efficacy, and providing drug information. Pharmacists, therefore, are and should be experts on drug therapy, and are the primary health professionals who optimize the use of medication to provide patients with positive health outcomes. Education and experience in the field should therefore be underscored.

This bill seeks to address the competency needs of the profession and also curb both unintentional or intentional harm that may be caused by an unregulated practice. This proposed measure will fulfill this objective through the:

1. Definition of the scope of nature and regulations of the professional practice of pharmacy;
2. Creation of the Professional Regulatory Board of Pharmacy;
3. Setting up of criteria or qualifications for the licensure of practitioners; and
4. Imposition of penalties for violators of this Act.

In view of the foregoing, the passage of this bill is earnestly sought.

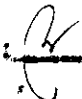

FRANCIS G. ESCUDERO
