### AGRICULTURE, FOOD AND AGRARIAN REFORM

Campbell, Bruce [and three other], editors. 2022. ***Transforming food systems under climate change through innovation.*** Cambridge : Cambridge University Press. 1 online resource digital, PDF file(s).

<https://www.cambridge.org/core/product/identifier/9781009227216/type/BOOK>

Our food systems have performed well in the past, but they are failing us in the face of climate change and other challenges. This book tells the story of why food system transformation is needed, how it can be achieved and how research can be a catalyst for change. Written by a global interdisciplinary team of researchers, it brings together perspectives from multiple areas including climate, environment, agriculture, and the social sciences to describe how different tools and approaches can be used to tackle food system transformation. It provides practical, actionable insights for policymakers and advisors, demonstrating how science together with strong partnerships can enable real transformation on the ground. It also contributes to the academic debate on the transformation of food systems, and so will be an invaluable reference for researchers and students alike.

## ECONOMIC AFFAIRS

Esguerra, Emmanuel F., Ramon L. Clarete, Hal Hill, editors. [2018]. ***The Philippine economy : no longer the East Asian exception?***. Singapore : ISEAS Publishing.

1 online resource (439 p.)

DeGruyter eBook collection (Only accessible within the Senate premises)

In this volume, a leading group of scholars pose the question, has the Philippine economy rejoined the dynamic East Asian mainstream and, if so, what set of policies and priorities are required to maintain the strong economic momentum of recent years? Successive chapters address issues related to growth and poverty, infrastructure and urbanization, education, health, the environment, energy, development finance, and governance and institutions. This volume has been written with a broad audience in mind. First and foremost it is for readers in, and interested in, this fascinating and important country with a population that now exceeds 100 million people. Second, it will appeal to those in the broader development community with an interest in the analytical and policy challenges that democratic, middle-income countries face as they struggle to lift their citizens out of poverty and to achieve broad-based and environmentally sustainable growth.

## FOREIGN RELATIONS

Bailey, Adrian J., Ricardo K. S. Mak, editors. **Asia and China in the global era.** Berlin ; Boston : De Gruyter Mouton. 1 online resource (XI, 225 p.)

DeGruyter eBook collection (Only accessible within the Senate premises)

China's strong economic growth occurring alongside modernization across the great majority of Asian societies has created what many see as a transnational space through and by which not only economic, social and cultural resources, but also threats and crises flow over traditional political boundaries. The first section of the work lays out a clear conceptual framework. It draws on arguments about nation no longer being the only container of society, about trans-disciplinary thinking, and about knowledge being

context-bound. It identifies and discusses distinctive features of China and Asia in the global era. These include population, urbanization and climate change; the continuing reach of Orientalist shadows; cultural politics of knowledge. It closes by arguing how global studies adds value to existing accounts. The second, and longer, section applies this framework through a series of original empirical case-studies in three areas: migration/poverty/gender; culture/education; well-being.

#### LABOR, EMPLOYMENT AND HUMAN RESOURCES DEVELOPMENT

Isaac, Allan Punzalan. 2021. *Filipino time : affective worlds and contracted labor.* New York, NY : Fordham University Press. 1 online resource (192 p.) : 4 b/w illustrations.

DeGruyter eBook collection (Only accessible within the Senate premises)

From spectacular deaths in a drag musical to competing futures in a call center, Filipino Time examines how contracted service labor performed by Filipinos in the Philippines, Europe, the Middle East, and the United States generates vital affects, multiple networks, and other life worlds as much as it disrupts and dislocates human relations. Affective labor and time are re-articulated in a capacious archive of

storytelling about the Filipino labor diaspora in fiction, musical performance, ethnography, and documentary film. Exploring these cultural practices, *Filipino Time* traces other ways of sensing, making sense of, and feeling time with others, by weaving narratives of place and belonging out of the hostile but habitable textures of labor time. Migrant subjects harness time and the imagination in their creative, life making capacities to make communal worlds out of one steeped in the temporalities and logics of capital.

## NATIONAL DEFENSE AND SECURITY, PEACE, UNIFICATION AND RECONCILIATION

Delerue, Francois. 2020. ***Cyber operations and international law***. Cambridge : Cambridge University Press. 1 online resource (xxii, 513 pages) : digital, PDF file(s).

Cambridge e-book collection (Full text access only available inside the library)

This book offers a comprehensive analysis of the international law applicable to cyber operations, including a systematic examination of attribution, lawfulness and remedies. It demonstrates the importance of countermeasures as a form of remedies and also shows the limits of international law, highlighting its limits in resolving issues related to cyber operations. There are several situations in which international law leaves the victim State of cyber operations helpless. Two main streams of limits are identified. First, in the case of cyber operations conducted by non-state actors on the behalf of a State, new technologies offer various ways to coordinate cyber operations without a high level of organization. Second, the law of State responsibility offers a range of solutions to respond to cyber operations and seek reparation, but it does not provide an answer in every case and it cannot solve the problem related to technical capabilities of the victim.

## SCIENCE AND TECHNOLOGY

Porsdam, Helle and Sebastian Porsdam Mann, editors. 2022. ***The right to science : then and now.*** Cambridge : Cambridge University Press. 1 online resource (xii, 309 pages) : digital, PDF file(s).

<https://doi.org/10.1017/9781108776301>

That everyone has a human right to enjoy the benefits of the progress of science and its applications comes as a surprise to many. Nevertheless, this right is pertinent to numerous issues at the intersection of science and society: open access; 'dual use' science; access to ownership and dissemination of data, knowledge, methods and the affordances and applications thereof; as well as the role of international co-operation, human dignity and other human rights in relation to science and its products. As we advance towards superintelligence, quantum computing, drone swarms, and life-extension technology, serious policy decisions will be made at the national and international levels. The human right to science provides an ideal tool to do so, backed up as it is by international law, political heft, and normative weight. This book is the first sustained attempt at turning this wonder of foresight into an actionable and justiciable right.

## SUSTAINABLE DEVELOPMENT GOALS, INNOVATION AND FUTURES THINKING

Baltzersen, Rolf K. 2022. ***Cultural-historical perspectives on collective intelligence : patterns in problem solving and innovation.*** Cambridge, United Kingdom ; New York, NY : Cambridge University Press. 1 online resource (xviii, 448 pages) : digital, PDF file(s).

<https://doi.org/10.1017/9781108981361>

In the era of digital communication, collective problem solving is increasingly important. Large groups can now resolve issues together in completely different ways, which has transformed the arts, sciences, business, education, technology, and medicine. Collective intelligence is something we share with animals and is different from machine learning and artificial intelligence. To design and utilize human collective intelligence, we must understand how its problem-solving mechanisms work. From democracy in ancient Athens, through the invention of the printing press, to COVID-19, this book analyzes how humans developed the ability to find solutions together. This wide-ranging, thought-provoking book is a game-changer for those working strategically with collective problem solving within organizations and using a variety of innovative methods. It sheds light on how humans work effectively alongside machines to confront challenges that are more urgent than what humanity has faced before.

## TRADE, COMMERCE AND ENTREPRENEURSHIP

Bantekas, Ilias [and four others]. 2020. ***UNCITRAL model law on international commercial arbitration : a commentary***. Cambridge : Cambridge University Press. 1 online resource (cxxx, 1013 pages) : digital, PDF file(s).

Cambridge e-book collection (Full text access only available inside the library)

This book provides a comprehensive commentary on the UNCITRAL Model Law on International Arbitration. Combining both theory and practice, it is written by leading academics and practitioners from Europe, Asia and the Americas to ensure the book has a balanced international coverage. The book not only provides an article-by-article critical analysis, but also incorporates information on the reality of legal practice in UNCITRAL jurisdictions, ensuring it is more than a recitation of case law and variations in legal text. This is not a handbook for practitioners needing a supportive citation, but rather a guide for practitioners, legislators and academics to the reasons the Model Law was structured as it was, and the reasons variations have been adopted.

## WOMEN, CHILDREN, FAMILY RELATIONS AND GENDER EQUALITY

Baughan, Emily. 2021. ***Saving the children : humanitarianism, internationalism, and empire.*** Berkeley, CA : University of California Press. 1 online resource (314 p.)

[DeGruyter eBook collection \(Only accessible within the Senate premises\)](#)

Saving the Children explores the intersection of liberal internationalism and imperialism through the history of the humanitarian organization Save the Children, from its formation during the First World War through the era of decolonization. Whereas Save the Children claimed that it was "saving children to save the world," the vision of the world it sought to save was a strictly delimited one, characterized by international capitalism and colonial rule. Emily Baughan's groundbreaking analysis, across fifty years and eighteen countries, shows that Britain's desire to create an international order favorable to its imperial rule shaped international humanitarianism. In revealing that modern humanitarianism and its conception of childhood are products of the early twentieth-century imperial economy, *Saving the Children* argues that the contemporary aid sector must reckon with its past if it is to forge a new future.
