S. No. 2909

RECEIVED BY: 

INTRODUCED BY SEN. JINGGOY EJERCITO ESTRADA

EXPLANATORY NOTE

The Department of Environment and Natural Resources (DENR) has recognized that air pollution from the transport sector is one of the major challenges in addressing air pollution and air quality in the country. The transport sector's contribution to air pollution is a serious and a critical issue in the country, particularly in Metro Manila and major cities nationwide. As of 2010, the total number of motor vehicles registered with the Land Transportation Office already reached 6,634,555 which reflect an annual average increase of six percent (6%).

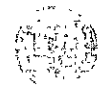

This measure seeks to enhance and strengthen the national motor vehicle inspection and maintenance program to address the alarming air pollution from the transport sector as well as help promote an efficient and safe operation of all motor vehicles. Likewise, majority of the road accidents are caused by the unsafe practices of drivers and roadworthiness of in-use vehicles in the country.

As such, the Department of Transportation and Communications (DOTC) shall be tasked to formulate a comprehensive plan to improve the efficiency and effectiveness of the Motor Vehicle Inspection System nationwide. Further, a complete facility in various regions shall be established for the re-tooling and continuous education of drivers, specifically those who use their profession for public transport.

In view of the foregoing, immediate passage of this bill is earnestly sought.
