SENATE

S. No. 3240

ad

Introduced by **Senator FRANCIS G. ESCUDERO**

EXPLANATORY NOTE

Article II, Section 16 of the Philippine Constitution states that "the State shall protect and advance the right of the people to a balanced and healthful ecology in accord with the rhythm and harmony of nature."

This bill seeks to establish the Taal Volcano Protected Landscape (TVPL) under the National Integrated Protected Areas System (NIPAS).

Taal Volcano is one of the lowest active volcanoes in the world and the deepest lake in the Philippines and 3rd largest lake next to Lagunal Lake and Lake Mainit. Tawilis (*Sardinella tawilis*), the only freshwater sardine known in the world is endemic to Taal Lake. It is considered as the most valuable fish in the area that demand massive conservation. Taal Lake is also home to a venomous "sea snake" (*Hydrophis semperi*). This species is one of the only few snakes of its type that breeds in freshwater and is only known freshwater sea snake in the Philippines.

The passage of this bill will help protect and conserve the watershed area surrounding the lake as well as its cultural, historical, scenic and diverse fresh water ecosystem and resources.
