Senate Bill No. 364

INTRODUCED BY SEN. JINGGOY EJERCITO ESTRADA

EXPLANATORY NOTE

Milk consumers are improperly informed about the contents of milk they acquire from the market. There is also no uniform standards as to the contents of skim milk, low fat milk and milk as beverage in final package.

The Constitution, Article II, Section 15 provides that "The State shall protect and promote the right to health of the people and instill health consciousness among them." In accordance with the constitutional mandate, this bill provides for the proper labeling of milk products indicating distinctly in its package the non-fat and protein contents of milk solids that are non fat in the classification of skim milk, low fat and milk beverage. With this innovation it is expected that the consuming public will be properly informed about the nutritional contents and value of the milk they consume. The quality of milk will likewise be upgraded in order to conform with proper nutritional standards.

In view hereof, the early passage of this proposed measure is highly recommended.
