Senate Bill No. 370

RECEIVED BY: 

INTRODUCED BY SEN. JINGGOY EJERCITO ESTRADA

EXPLANATORY NOTE

All local government units have to dispose of solid waste. The problems of collection and disposal are magnified in highly urbanized areas, like Metro Manila because solid waste disposal not only includes urban household garbage but also industrial and hospital wastes, as well.

Disposal maybe made through sanitary landfills. Some make use of incineration. Other areas in the world "treat" solid waste and dispose of the semi-liquified treated or screened sewage and virtually dump these into surrounding water sources and bodies of water, whether inland or in the oceans.

Unfortunately, collection and disposal of solid wastes lead to pollution of the land where the wastes are dumped and compacted or piled, or of the rivers, creeks, lakes and bays where the waste eventually leak to.

At any rate, all provinces and independent cities need to provide for an integrated waste collection and disposal system as an integral part of their basic services. This service must be anticipated and provided for before the landfill becomes intolerable and not only an eyesore, a serious health hazard and environmental problem involving air, water and soil.

With this view, this measure seeks to amend the Local Government Code, R.A. 7160, to integrate solid waste collection and disposal as a basic service and empower the local government sanggunians to provide for this basic service. It is also intended to alert the people to advocate provision of this service within the local government units where they live and to awaken the interest of local government legislators to plan and implement their respective systems for waste collection and disposal

To the end that the health, well-being and safety of our people be achieved through the provision of the basic service of an integrated solid waste collection and disposal, approval of this measure is urgent and necessary.
