### EXPLANATORY NOTE

Amusement parks usually include a collection of rides that entertains and caters to adults, teenagers and children. Since these places continue to serve as places of recreation and leisure, amusement parks have continued to be visited by many Filipinos.

However, there is no single government agency which is primarily tasked to oversee and regulate the operation of amusement parks. Also, there are no specific standards that ensure the safe operation and maintenance of the rides in these theme parks. Although the Local Government Units (LGUs) have the authority to issue amusement parks permit to operate, LGUs do not have power over the operation of these establishments to ensure that the rides comply with the highest safety standards.

In recognition of the urgent need to protect the general public patronizing these theme and amusement parks against unreasonable risks, a legislation which main purpose is to prevent accidents through early identification of unsafe amusement rides is highly important.

This bill seeks to create an Amusement Industry Safety Board which shall serve as the sole regulating body on all matters pertaining to the amusement rides and devices. The bill also finds it necessary for the amusement rides to be inspected four times annually by a certified amusement ride inspector, and before daily operation by the owner or operator of the amusement ride. The bill further provides incentives to enterprises engaged in Amusement Industry.

In view of the foregoing, the immediate approval of this bill is earnestly sought.
