EXPLANATORY NOTE

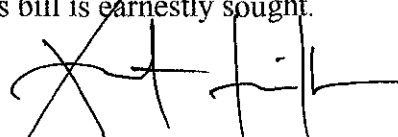

In the country, cancer ranks as a third leading cause of mortality¹, claiming 103 lives a day or four persons every hour. The estimated incidence rate is 189 persons per 100,000 Filipinos. Despite this fact, there is no specialized care for all cancer sites in the Philippines.

Although there are several specialized hospitals with complete facilities for cancer patients, the same are concentrated or centralized in Metro Manila, primarily catering the needs of cancer patients in the National Capital Region, which is one of the areas with the highest cases of cancer. However, the cancer incidents are not only prevalent in NCR. Admittedly, many regions in the country do not have cancer hospitals with sufficient equipment and facilities to cater the needs of patients suffering from cancer.

The establishment and maintenance of the cancer center would primarily benefit the people suffering from cancer and would also further enhance the noble undertaking of research in cancer, provide a state of the art training of medical and technical personnel and render specialized medical services for the prevention, control and treatment of cancer.

Thus, this bill seeks to establish a national cancer center in the Province of Pampanga to be known as Philippine National Cancer Center. It is imperative to decentralize the hospitals providing services to these patients particularly in regions outside Metro Manila. The province of Pampanga is accessible to the patients from the other areas with high prevalence of cancer incidents. It is strategically located to provide services and address the cancer cases in the regions with the highest reported cases particularly in Region 3.

In light of the foregoing, the immediate passage of this bill is earnestly sought.

ANTONIO "SONNY" F. TRILLANES IV
Senator
