SENATE BILL NO. 844

INTRODUCED BY **SENATOR JOSEPH VICTOR G. EJERCITO**

EXPLANATORY NOTE

This bill provides for the creation of a People's Fund, which shall comprise thirty percent (30%) of all proceeds from the VAT collected under Title IV of the National Internal Revenue Code. This portion estimates the share of incremental revenues from RA 9337, the Expanded Value-Added Tax law, which increased to 12% the VAT and removed the exemption.

These proceeds shall be allotted and deposited in a separate trust fund or account to be created within the National Treasury. The said portion shall be derived from all proceeds from the VAT after the share of the Bureau of Internal Revenue from actual VAT collections in excess of its collection goal, as provided for in Section 285 of this Act.

To ensure that the People's Fund will cater to the people's needs, the President is asked to embark on broad consultations through the different departments and agencies of government on a 3-year utilization plan for public education and health. As envisioned, these revenues will help close the resource gaps in teachers' training and salaries, infrastructure needs like classrooms and school buildings, among others. In the area of health, these funds will alleviate problems concerning substandard government hospitals and clinics, lack of medical personnel and equipment, malnutrition especially among children and minors, among others. The 3-year utilization plan to be submitted by the President to Congress for approval would ensure continuity of programs and a more programmatic approach in resolving perennial problems rather than the usual incremental application of resources that never quite closes these gaps.

Passage of this measure shall also prevent the use of VAT resources under the People's Fund to augment the maintenance and other operating expenses of any national government agency and/or government-controlled corporation, local government unit or any office under their supervision. Funding for such expenses can be

sourced from traditional sources of revenues such as income taxes, customs collections, and other fees attached to government services.
