**EXPLANATORY NOTE**

It is in the interest of the people and the future of our nation that each student receives a high quality of education. Section I, Article XIV of the Constitution provides that the State shall protect and promote the right of all citizens to quality education at all levels, and shall take appropriate steps to make such education accessible to all. Further, Section (2)(1) of the same mandates that the State shall establish, maintain, and support a complete, adequate, and integrated system of education relevant to the needs of the people and the society. Thus, the improvement of public's access to public school performance indicators and benefits of the increasing public investment in the Philippines' schools is just but necessary, especially that most of the Filipino students are falling behind those in other countries.

This bill seeks to create the Division of Public School Accountability which shall administer all monitoring and compliance activities dealing with academic accountability for each school or school district and to report academic progress. The presence of such shall hold each of the country's public schools accountable for the academic progress of each student. Further, this proposed measure shall bring forth a comprehensive system to hold students, schools, and districts accountable for improving 'student performance and measuring the academic achievements of all students. This, in the long run, shall ensure that each child in the Philippines shall receive a high quality education consistent with nationwide content and performance standards.

In view of the foregoing, the early passage of this bill is earnestly sought.
