#### EXPLANATORY NOTE

Chiropractic is a health care profession which focuses on the diagnosis, treatment and prevention of mechanical disorders of the musculoskeletal system with special emphasis on the spine. It is hypothesized that the general health of an individual is affected by these disorders via the nervous system<sup>1</sup>. Chiropractors also known as chiropractic physicians are individuals who specialize in the treatment of patients with health problems that involve the musculoskeletal system.

This method of health care is popular and well-established in USA, Canada and Australia. It is also present to a lesser extent in other countries, such as the Philippines. At present, there are individuals who are practicing chiropractics in the Philippines, however, we do not have any agency that regulates this practice.

This proposed measure aims to professionalize the chiropractic profession by creating a Chiropractic Board of Examiners which would regulate the chiropractic profession to ensure the excellent, competitive, and accountable practice of chiropractic. The proposed measure seeks to protect not only the clients of chiropractic physicians but also the practitioners as well as the credibility of their profession.

In view of the foregoing, immediate passage of this bill is earnestly sought.
