

SIXTEENTH CONGRESS OF THE )  
REPUBLIC OF THE PHILIPPINES )  
First Regular Session )

'13 JUL 23 P4:49

SENATE

S.B. NO. 1085

RECEIVED BY: *ja*

---

Introduced by **Senator TEOFISTO "TG" GUINGONA III**

---

#### EXPLANATORY NOTE

Access to energy is vital in achieving the government's goal of spurring economic activity to create livelihood and employment for 92.3 million Filipinos, 26.5 percent of which are currently living below the poverty threshold (National Statistics Office, 2012). The demand for energy is expected to increase even further in light of the country's growing population, currently pegged at 1.9 percent per year (NSO, 2012). The government basically addresses this situation two-fold: 1) by ensuring adequate supply through vigorous development of indigenous energy resources and promoting investments in the power sector, and 2) managing domestic energy consumption.

Based on the DOE 2010-2030 energy saving forecast projection, there is an annual energy saving potential of 3,455 kilotons of oil equivalent (KTOE) that can be contributed by the energy demand sector comprising of household, industrial, commercial, transport and agriculture sectors. It has a monetary equivalent value of PhP 122 million per year and enough to support socio-economic development of a certain region of the country. Likewise, such projected potential energy saving shall impact on the deferment or postponement of putting-up additional virtual power plant capacity equivalent to 340 Megawatts. On the other hand, the direct contribution of investments and job opportunities could help reciprocate in achieving a sustainable economic environment in this sector of energy. For the environment, a CO<sub>2</sub> reduction shall be in the level of 8.9 million tons per year which means reducing stress to the environment that have direct impact to the survival of the population. Henceforth, the Philippines can actively support global efforts to use energy efficiently as it is widely regarded as the most cost-effective means to reduce CO<sub>2</sub> emissions in the energy sector and mitigate climate change.

Due to the high cost of energy that fuels its economic growth and insufficient indigenous energy resources at this time, the country has to ensure that all present and future energy supply must be used in an efficient manner with minimal waste. This demand-side approach not only contributes to the national economy, but helps the environment as well through the reduction of harmful emissions caused by the combustion of fuel. Furthermore, it is a low-cost and relatively quick but effective solution to managing the nation's energy security.

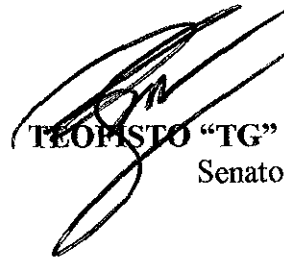

While the government has espoused energy efficiency and conservation since the oil crisis of the early seventies, such policy has not been institutionalized through legislation.

Numerous executive orders and issuances had been issued to implement said policy, but the lack of an overall framework has precluded the crafting of comprehensive national energy efficiency and conservation programs involving all sectors of the economy and the population at large.

In view of the foregoing considerations, this Energy Efficiency and Conservation measure is being proposed to address the gap by setting an overall policy framework, promoting energy efficiency and conservation through various means, including fiscal and non-fiscal incentives, empowering the Department of Energy to effectively implement the same. Among the other features of the bill are providing incentives for significant capital investments and accreditation of energy service providers and energy manager/ professionals, information, education and communication activities, formulation of an energy utilization data base, setting of performance standards and enforcing compliance thereto.

Although this may require building the capacity of government to effectively perform its monitoring and regulatory functions, it does not necessarily entail substantial increases in expenditures as many of the foreseen activities can be undertaken through new modalities of cooperation such as public-private partnerships, international and regional cooperation and assistance from multilateral organizations.

In view of the foregoing, the passage of this bill is earnestly sought.

**TEODORO "TG" GUINGONA III**  
Senator

**AN ACT INSTITUTIONALIZING ENERGY EFFICIENCY AND CONSERVATION,  
ENHANCING THE EFFICIENT USE OF ENERGY, GRANTING INCENTIVES TO  
ENERGY EFFICIENCY AND CONSERVATION PROJECTS, AND FOR OTHER  
PURPOSES**

*Be it enacted by the Senate and House of Representatives of the Philippines in Congress  
assembled:*

**CHAPTER I**

**GENERAL PROVISIONS**

1  
2  
3  
4  
5  
6 **SECTION 1. Short Title.** – This Act shall be known as the “Energy Efficiency and  
7 Conservation Act of 2013.”  
8

9 **SECTION 2. Policy Declaration.** – It is hereby declared the policy of the State to  
10 institutionalize energy efficiency and conservation as a national way of life geared towards  
11 the efficient and judicious utilization of energy by formulating, developing, and  
12 implementing energy efficiency and conservation plans and programs to enhance energy  
13 supply security of the country, cushion the impact of the high price of imported fuels to local  
14 markets and protect the environment in support to the economic and social development  
15 goals of the country.  
16

17 **SECTION 3. Role of Energy Users.** – All Energy users shall exert efforts to use every  
18 available energy resources judiciously and efficiently in compliance with the fundamental  
19 policies of this Act.  
20

21 **SECTION 4. Scope.** – This Act shall establish a framework for introducing and  
22 institutionalizing fundamental policies on energy efficiency and conservation including the  
23 promotion of efficient and judicious utilization of energy and the definition of responsibilities  
24 of various government agencies and private entities.  
25

26 **SECTION 5. Definition of Terms.** – For purposes of this Act, the following terms shall,  
27 unless the context indicates otherwise, have the following meanings:  
28

1           (a) **Certified Energy Manager (CEM)** refers to a Professional who becomes eligible  
2 for this certification after demonstrating expertise in several areas ranging from standards for  
3 energy-consuming appliances, equipment, products, vehicles and systems; air quality; energy  
4 audits; procurement and financing. It recognizes individuals who have demonstrated high  
5 levels of experience, competence, proficiency and ethical fitness in the energy management  
6 profession. Type 2 Designated Establishments shall appoint a CEM who shall be responsible  
7 for management of energy consumption of its facility or facilities.

8  
9           (b) **Demand Side Management** refers to measures undertaken by distribution utilities  
10 to encourage end-users in the proper management of their load to achieve efficiency in the  
11 utilization of fixed infrastructures in the systems;

12  
13           (c) **Designated Establishment (Type 1 / Type 2 Designated Establishment)** refers to  
14 private entity in industrial, commercial, transport and power sectors consuming energy and/or  
15 having other index equivalent to such energy for the previous year beyond the level specified  
16 by the Department of Energy (DOE). Such establishments shall be categorized as Type 1 or  
17 Type 2 Designated Establishment, according to the annual energy consumption [Type 1:  
18  $\geq 1,000,000$  but  $< 2,000,000$  Liters of Oil Equivalent (LOE), Type 2:  $\geq 2,000,000$  Liters of Oil  
19 Equivalent (LOE)];

20  
21           (d) **Distribution Utility** refers to any electric cooperative, private corporation,  
22 government-owned utility or existing local government unit (LGU) which has an exclusive  
23 franchise to operate the system of wires extending between the delivery points of the  
24 transmission system and the customer point of connection. A distribution utility shall have  
25 the obligation to provide distribution services to any end-user within its franchise area;

26  
27           (e) **Energy Audit** refers to the evaluation of energy consumption and review of  
28 current energy cost, to determine ways in which energy can be conserved to achieve savings.  
29 The three types of energy audit are walk-through audit, preliminary audit and detailed audit;

30  
31           (f) **Energy Conservation** refers to reducing the loss and waste in various energy  
32 stages from energy production to energy consumption and using energy more efficiently and  
33 rationally through application of appropriate energy management system and adopting  
34 measures which are technologically feasible, economically sound and environmentally and  
35 socially affordable;

36  
37           (g) **Energy Conservation Officer (ECO)** refers to a person appointed by Type 1  
38 Designated Establishments responsible for the supervision and maintenance of facilities for  
39 the proper management of energy consumption and such other functions deemed necessary  
40 for the efficient and judicious utilization of energy prescribed under this Act;

41           (h) **Energy Efficiency** refers to the efficient utilization of energy in its various forms  
42 through cost-effective options towards the use of less energy for the same or higher  
43 performance than regular products or energy systems;

44  
45           (i) **Energy Management** refers to the process of managing energy consumption to  
46 ensure that energy has been efficiently consumed;

47  
48           (j) **Energy Using Entities** refers to all energy demand sectors such as commercial,  
49 industrial, transport, agricultural, household, government buildings and the power generation,  
50 transmission and distribution industry sectors;

1  
2 (k) *Energy Conservation Report* refers to the periodic report submitted to the DOE  
3 by Type 2 Designated Establishments and Transmission Utility with regard to the EE&C  
4 plan. The items to be reported in the Energy Conservation Report shall be specified by the  
5 DOE;

6  
7 (l) *Energy Consumption Report* refers to the periodic report submitted to the DOE  
8 by Type 1 or Type 2 Designated Establishments and Transmission Utility with regard to the  
9 energy consumption and energy loss and other status of energy use. The items to be reported  
10 in the Energy Consumption Report shall be specified by the DOE;

11  
12 (m) *Specific Energy Consumption (SEC)* refers to the energy consumption volume  
13 required per unit, such as production volume, sales amount, transportation ton-km,  
14 transportation km, floor space and such other indicators relevant to energy consumption;

15  
16 (n) *System Loss* refers to the difference between the electric energy purchased and  
17 generated and the electric energy sold by a Distribution Utility. For purposes of this Act, the  
18 term System Loss shall consist of the following components: Technical System Loss,  
19 referring to the loss inherent in the physical delivery of electric energy, including conductor  
20 loss, transformer core loss and technical errors in meters; Non-Technical Loss, referring to  
21 energy loss not related to the physical characteristics of the electrical system, including those  
22 attributable to pilferage, tampering of meters and erroneous meter reading; and  
23 Administrative Loss, referring to the energy required for the operation of the distribution  
24 system and any un-billed energy for community-related activities;

25  
26 (o) *Transmission Utility* refers to any private corporation or government-owned  
27 utility which has an exclusive franchise to operate the system of wires extending from power  
28 generating units to the delivery points through the grid. A transmission utility shall have the  
29 obligation to provide distribution services to any end-user within its franchise area.; and

30  
31 (p) *Waste Heat Recovery* refers to the extraction of heat from fluids (i.e., gases or  
32 liquids) produced in a thermodynamic or separation process, that would otherwise be vented  
33 to the atmosphere, reinjected to the ground or disposed of by other means, for power  
34 generation or other applications.

## 35 36 37 CHAPTER 2

### 38 39 TYPE 1 AND TYPE 2 DESIGNATED ESTABLISHMENTS

40  
41  
42 SECTION 6. *Type 1 Designated Establishments.* Establishments with an annual energy  
43 consumption equal to or more than 1,000,000 Liters of Oil Equivalent (LOE) but less than  
44 2,000,000 LOE are hereby categorized as Type 1 Designated Establishment and shall include  
45 the following sectors:

- 46  
47 a) Building Sector  
48 1) Commercial Building  
49 2) Hotel  
50 3) Hospital Building

- 1                   4) Educational Institutions
- 2                   5) Office Building
- 3
- 4           b) Industrial/Manufacturing(Medium size industrial/manufacturing plant)
- 5                   1) Food and Beverages
- 6                   2) Plastic
- 7                   3) Metal Fabrication
- 8                   4) Chemical
- 9                   5) Appliance
- 10
- 11           c) Transport Sector (Fleet)
- 12                   1) Railway
- 13                   2) Road Transport
- 14                   3) Sea Freight and Passenger Vessel
- 15                   4) Air Transport cargo and passenger vessel
- 16
- 17           d) Power Sector
- 18                   1) Power Generation
- 19                   2) Distribution Utilities
- 20

21 **SECTION 7. *Obligations of Type 1 Designated Establishments.*** – Type 1 Designated  
22 Establishment shall have the following obligations:

- 23
- 24           a) Employ an Energy Conservation Officer (ECO) and duly notify the Department of  
25 Energy (DOE), said ECO's appointment or separation as soon as possible. The ECO shall  
26 manage the energy consumption of facilities, equipment and devices, the improvement and  
27 implementation of energy efficiency measures, the conduct of regular energy audit, energy  
28 monitoring and control and the preparation of periodic energy consumption report;
- 29
- 30           b) Keep records of monthly energy consumption data and other energy-related data;
- 31
- 32           c) Set up annual targets and plans for the implementation of energy efficiency and  
33 conservation projects or measures. Submit *a Semi-Annual Energy Consumption Report* to the  
34 DOE, not later than the 30<sup>th</sup> day of June and December;
- 35
- 36           d) Conduct, through competent energy auditors certified by bodies accredited by the  
37 DOE, or DOE-accredited energy service company or service provider, the periodic Energy  
38 Audit once every three (3) years and submit an Energy Audit Report to the DOE upon  
39 completion of the energy audit.
- 40
- 41           e) Improve average Specific Energy Consumption (SEC) by at least one percent  
42 (1%) year on year.
- 43

44 **SECTION 8. *Type 2 Designated Establishments.*** – Energy intensive establishments with an  
45 annual energy consumption equal to or more than 2,000,000 Liters of Oil Equivalent (LOE)  
46 are hereby categorized as Type 2 Designated Establishment and shall include the following  
47 sectors:

- 48
- 49           a) Building Sector
- 50                   1) Commercial

- 1                   2) Hotel
- 2                   3) Hospital
- 3                   4) Educational Institutions
- 4                   5) Office
- 5
- 6           b) Industrial/Manufacturing sectors
- 7                   1) Cement
- 8                   2) Mining
- 9                   3) Food and Beverages
- 10                  4) Electronic/Semi-Conductor
- 11                  5) Steel & Metal
- 12                  6) Chemical
- 13                  7) Vehicle
- 14                  8) Appliance
- 15                  9) Glass
- 16                  10) Plastic
- 17                  11) Others
- 18
- 19           c) Transport Sector (Fleet)
- 20                   1) Railway
- 21                   2) Road Transport Fleet
- 22                   3) Sea Freight and Passenger Vessel
- 23                   4) Air Transport cargo and passenger vessel
- 24
- 25           d) Power Sector
- 26                   1) Power Generating Plants
- 27                   2) Distribution and Transmission Utilities
- 28

29 **SECTION 9. Obligations of Type 2 Designated Establishments.** – Type 2 Designated  
 30 Establishments shall have the following obligations:

- 31
- 32           a) Employ one (1) Certified Energy Manager (CEM), subject to the provisions of
- 33 Section 11 of this Act, and duly notify the Department of Energy (DOE) said CEM's
- 34 appointment or separation as soon as possible. The CEM shall manage the energy
- 35 consumption of facilities, equipment and devices, the improvement and implementation of
- 36 energy efficiency measures, the conduct of regular energy audit, energy monitoring and
- 37 control, and the preparation of periodic energy consumption and energy conservation
- 38 program reports of the establishment;
- 39
- 40           b) Keep records on monthly energy consumption data and other energy-related data;
- 41
- 42           c) Set up annual targets and plans for the implementation of energy efficiency and
- 43 conservation projects;
- 44
- 45           d) Submit a *Semi-Annual Energy Consumption Report* and an *Annual Energy*
- 46 *Conservation Program Report* to the DOE not later than the 30<sup>th</sup> day of June and December;
- 47
- 48           e) Conduct, through competent energy auditor certified by bodies accredited by the
- 49 DOE or DOE-accredited energy service company or energy provider, periodic Energy Audit

1 once every three (3) years and submit Energy Audit Report to the DOE upon completion of  
2 the energy audit.

3  
4 f) Improve average Specific Energy Consumption (SEC) by at least one percent  
5 (1%) year on year.  
6

### 7 8 CHAPTER 3

#### 9 10 ROLE OF THE DEPARTMENT OF ENERGY

11  
12  
13 **SECTION 10. Responsibilities of the DOE.** – The DOE shall be the primary government  
14 agency responsible for the planning, formulation and development of energy management  
15 policies and other related energy efficiency and conservation programs and plans. The DOE  
16 is shall consult and coordinate with other government agencies and the private sector or  
17 create an inter-agency committee, as may be deemed necessary, for the effective  
18 implementation of energy efficiency and conservation policies of the government. It shall  
19 also promote collaborative efforts with the business sector, particularly the commercial,  
20 industrial, transport and power sectors, to broaden and enhance their efficient and judicious  
21 utilization of energy. The DOE shall, in consultation with the DTI-BPS, require  
22 manufacturers, importers and dealers to comply with the Minimum Energy Performance  
23 Standards (MEPS) and to display the Energy Label showing the energy requirement and  
24 consumption efficiency of products on their packaging, and on the products themselves,  
25 among them designated machinery and equipment, appliances, vehicles and other fuel-using  
26 combustion equipment and electric devices  
27

### 28 29 CHAPTER 4

#### 30 31 CERTIFICATION FOR PROFESSIONAL COMPETENCY AND ACCREDITATION 32 FOR PROFESSIONAL SERVICES

33  
34  
35 **SECTION 11. Certified Energy Manager (CEM) and Energy Conservation Officer (ECO).**  
36 – The Commission on Higher Education (CHED) and State Universities and Colleges (SCUs)  
37 shall formulate and develop appropriate training course modules for Energy Manager and  
38 Energy Conservation Officer under a Certificate Course Program for inclusion in the school  
39 curricula.  
40

41 Similarly, competent Non-Profit Organizations and other private training institutions  
42 duly accredited by the DOE and CHED shall offer professional certificate programs for  
43 Energy Manager and Energy Conservation Officer.  
44

45 **SECTION 12. Accreditation of Energy Service Company (ESCO) and other Energy**  
46 **Efficiency Service Provider (EESP).** – The Department of Energy shall promote and  
47 implement an Energy Service Company (ESCO) Accreditation System as an important  
48 component for market development measures and for the following purposes:  
49

50 a) development of professional and qualified ESCOs and energy engineers;

- 1  
2 b) enhance the capabilities of ESCOs, particularly in their energy auditing services;  
3  
4 c) enhance support services procurement and selection procedures;  
5  
6 d) enhance support to public sector incentive schemes in the promotion of energy  
7 efficiency; and  
8  
9 e) reduce energy wastage and eliminate false claims on energy efficiency among  
10 industry players.  
11

12 The development of this sector shall expand the general service sector and stimulates  
13 economic development through enhancing cost competitiveness while at the same time  
14 strengthening Philippine energy security. The accreditation process of this energy service  
15 sector is a natural segment of the knowledge economy, providing sustainable environmental  
16 and energy-saving benefits.  
17

## 18 19 **CHAPTER 5**

### 20 21 **INCENTIVES FOR ENERGY EFFICIENCY AND CONSERVATION PROJECTS**

22  
23  
24 **SECTION 13.** *Incentives for Energy Efficiency and Conservation Projects.* The DOE shall  
25 endorse projects that utilize pioneering energy efficient technologies to the Board of  
26 Investments (BOI) to avail of incentives for a period of five years (5) upon the effectivity of  
27 this Act. Such incentives shall include (a) tax and duty free importation of pioneering energy  
28 efficient technologies; or (b) income tax holiday.  
29

## 30 31 **CHAPTER 6**

### 32 33 **MISCELLANEOUS PROVISIONS**

34  
35  
36 **SECTION 14.** *Recommendation, Disclosure and Order.* – Upon determination that an  
37 establishment has committed of any of the prohibited acts under Section 16 of this Act, the  
38 DOE may consider the following measures prior to the imposition of the appropriate  
39 sanctions/penalties for such violations:  
40

41 (a) Provide citations in cases where the DOE finds materially insufficient reports,  
42 false returns, and non-submission of notifications or reports;  
43

44 (b) Disclose the name of the establishment in cases where the establishment that has  
45 received a citation under the preceding paragraph, failed to remedy such citation by the  
46 DOE; and  
47

48 (c) Issue an Order to the establishment to take measures in cases where the said  
49 establishment failed to follow or comply with the citation or recommendations issued by the

1 DOE. Failure on the part of the establishment to comply with such order shall be ground for  
2 imposition of penalties in accordance with Section 17 of this Act.  
3

4 **SECTION 15. *On-site Inspections*** – For the effective enforcement of this Act, the DOE shall  
5 have the right to visit Designated Establishments to inspect energy-consuming facilities,  
6 evaluate energy management procedures, identify areas for efficiency improvement, and  
7 verify energy monitoring reports and other documents related to the compliance requirements  
8 of this Act.  
9

## 10 11 **CHAPTER 7**

### 12 13 **FINAL PROVISIONS**

14  
15  
16 **SECTION 16. *Prohibited Acts***. – The following acts shall be prohibited:  
17

18 a) Failure and/or willful refusal to submit periodic reportorial compliance reports to  
19 the DOE;

20  
21 b) Failure and/or willful refusal to appoint/designate an Energy Conservation Officer  
22 and Certified Energy Manager;

23  
24 c) Failure to comply with the Order under Section 15 hereof; and

25  
26 d) Willful refusal to submit energy audit report.  
27

28 **SECTION 17. *Penalties***. – Any person who willfully commits any of the prohibited acts  
29 enumerated under this Act shall, upon conviction, be liable for penalties that will be defined  
30 in the Implementing Rules and Regulations of this Act.  
31

32 **SECTION 18. *Contingency Powers***. – Upon the recommendation of the Secretary of Energy,  
33 in times of critical energy supply disruptions or imminent danger thereof, the President may  
34 direct the adoption of stringent energy conservation measures, including but not limited to  
35 power/fuel allocations or rationing; limiting the operating hours of commercial, industrial and  
36 similar establishments; restricting the use of government and private motor vehicles;  
37 staggering or limiting working hours in both public and private sectors; and the temporary  
38 closure of all energy intensive industries.  
39

40 **SECTION 19. *Appropriations***. – Such sums as may be necessary for the implementation of  
41 this act shall be taken from the current fiscal year appropriation of the Department of Energy.  
42 Thereafter, the amount needed for the implementation of the act shall be included in the  
43 annual general appropriation.  
44

45 **SECTION 20. *Implementing Rules and Regulations***. – The DOE shall, in consultation with  
46 concerned government agencies and/or entities, the energy, industrial and commercial  
47 sectors, and other relevant stakeholders, promulgate the Implementing Rules and Regulations  
48 (IRR) of the Act within six (6) months from the effectivity of this Act.  
49

1 **SECTION 21. *Separability Clause.*** – If for any reason, any section or provision of this Act is  
2 declared unconstitutional or invalid, such parts not affected thereby shall remain in full force  
3 and effect.

4  
5 **SECTION 22. *Repealing Clause.*** – All laws, Presidential decrees, executive orders,  
6 issuances rules and regulations, inconsistent with the provisions of this Act are hereby  
7 repealed or modified accordingly.

8  
9 **SECTION 23. *Effectivity.*** – This Act shall take effect fifteen (15) days after its publication in  
10 at least two (2) newspapers of general circulation following its approval.

Approved,
