**AN ACT
EXTENDING THE SERVICES OF A SCIENTIST WHO IS DUE FOR COMPULSORY
RETIREMENT FOR A MAXIMUM PERIOD OF FIVE (5) YEARS AMENDING FOR THE
PURPOSE REPUBLIC ACT NO. 8439, OTHERWISE KNOWN AS THE MAGNA CARTA FOR
SCIENTISTS, ENGINEERS, RESEARCHERS AND OTHER SCIENCE AND TECHNOLOGY
PERSONNEL IN GOVERNMENT**

EXPLANATORY NOTE

Filipino scientists and innovators have been lauded and recognized here and abroad for their significant contributions on medical, food development, climate change and disaster research, to name a few. Some have received awards for helping advance the cause of science while serving society at the same time.

To harness the expertise of Filipino scientists for a longer period of time, this proposed bill seeks to raise their retirement age from 60 to 65 years, amending for this purpose Section 16 of Republic Act No. 8439, otherwise known as the Magna Carta for Scientists, Engineers, Researchers and Other Science and Technology Personnel in Government. The proposed measure would extend the services of scientists who are due for compulsory retirement for a maximum period of five years provided that their research project is within the priority research development programs of the Department of Science and Technology, and if the scientist is still mentally and physically fit to complete the project.

Given the knowledge, ideas, skills and leadership capabilities that senior scientists have acquired over the years, they are better fit to lead productive research groups and serve as mentors to students and young scientists. By raising their retirement age, we are not only allowing them to satisfactorily finish their research projects for the benefit of the country, we are also giving them the opportunity to teach and share their expertise to help shape the future of their respective scientific fields.
