Senate Bill No. 720

RECEIVED BY: 

Introduced by **SENATOR CYNTHIA A. VILLAR**

**AN ACT ESTABLISHING THE SMALL AND MEDIUM
ENTERPRISES STOCK EXCHANGE**

EXPLANATORY NOTE

Small and medium enterprises are the engines of the country's economic growth and development. They provide essential products and services and generate needed employment in a developing economy. In fact, it is the entrepreneurial energies unleashed by small and medium enterprises that underpin our country's quest for industrialization.

Yet the growth and momentum of SMEs are hobbled by capital constraints. Unlike large companies, SMEs experience more difficulties in obtaining finance to fund their capitalization or expansion requirements.

It is for these reasons that this bill is filed to assist SMEs in obtaining their financing requirements from the developing capital market in the country.

In one report, it stated that listing with the stock exchange is one way for small businesses to get capital to fund growth and expansion. The small-and medium-sized enterprises (SMEs) are urged to conduct an initial public offering (IPO) and take advantage of the stock market's strong capital inflows. Further, tapping the SME sector will help expand the investor base in the country.

In fact, it was reported in 2014 that the government-owned and controlled Development Bank of the Philippines (DBP) has signed an agreement with the Philippine Stock Exchange Inc. (PSE) to spur the listing of small and medium enterprises (SMEs) in the local bourse.¹ Under the agreement, DBP and PSE will come up with a framework for cooperation and coordination in the area of capital market development, particularly in raising capital market awareness among SMEs.²

Thus, it is an opportune time to consider the measure establishing a stock exchange that will cater to SMEs. A Small and Medium Enterprises Stock Exchange (SMEX) can be the equities market of growing businesses that may still not meet the capitalization requirements for public listing by the Philippine Stock Exchange (PSE). Public listing in the SMEX may well provide SMEs with a cheap and steady pool of funds for their business requirements.

Creation of the SMEX will also provide SMEs their benchmarks for business accomplishments, in making them aware of the processes and demands of making their enterprises "investment-ready."

The SMEX at the same time will broaden and deepen the capital markets by providing both foreign and local investors another window of investment opportunity. This has been the experience of the United States when they set up the National Association of Securities Dealers Automated Quotations (NASDAQ) stock market for growing companies, which has been the market for the public listing of phenomenal companies such as Intel and Microsoft.

In sum, alternative equities market like the SMEX can provide crucial institutional support to SMEs while at the same time laid the groundwork for more investment opportunities in the country today.

Thus, I recommend the immediate approval of this bill.
