EXPLANATORY NOTE

Organic fertilizers are *fertilizers derived from animal matter or vegetable matter (e.g. compost manure, animal wastes from meat processing, peat manure, slurry, and guano).*

It has come to our attention that much of the fertilizer needs of our farmers are still being met by traditional organic fertilizers. With the recent attraction towards organic farming i.e., farming, which uses organic fertilizers, local demand for traditional organic fertilizers has increased in the past few years. With the rise of such demand, a number of our farmers and their families have established cooperatives or associations trading in organic fertilizers.

Owing to the lack of access to information/education of many of our farmers, a number of them are exposed to possible criminal liability under Presidential Decree 1144, which states that:

Section 9. Registration and Licensing. No pesticides, fertilizers, or other agricultural chemical shall be exported, imported, manufactured, formulated, stored distributed, **sold or offered for sale**, transported, delivered for transportation or used **unless it has been duly registered with the FPA or covered by a number of provisional permit issued by the FPA for use in accordance with the conditions as stipulated in the permit**. Separate registrations shall be required for each active ingredient and its possible formulations in the case of pesticides or for each fertilizer grade in the case of fertilizer.

xxx

A violation of Section 9 is punishable under Section 10, which states that:

Section 10. *Penalties*

- (a) Fertilizer. Any person who violates any of the provisions of this Decree or any part of the provisions of the rules and regulations issued or promulgated by the FPA on fertilizer shall be punished by **imprisonment of not less than 15 years and 1 day or more than 20 years if the amount involved is more than P50,000.00; by imprisonment of not less than 10 years and 1 day or more than 15 years if the amount involved is P10,000.00 or less, as well as a fine ranging from the amount equal to the value involved to three times such value but which shall in no case be less than P5,000.00 nor more than P20,000.00; by a fine of P5,000.00 but not more than P10,000.00 by other violations where the amount involved cannot be determined; Provided that if**

falsification of a public or commercial document is committed by reasons or on the occasion of the commission of any of the acts punishable herein, the offender shall be imposed the maximum fine and term of imprisonment as above prescribed. If the violation is committed by a corporation, firm, partnership, cooperative, association or any other entity, the penalty shall be imposed upon the guilty office or offices and such corporation, firm, partnership, association or entity.

This representation is cognizant of the rationale for regulation of fertilizers. It does not propose the abolition of the penalties provided above. Instead, regulation should be encouraged in view of the susceptibility of a free market regime to abuse.

It is proposed that all registration, license fees and other administrative costs for farmer cooperatives and associations dealing with organic fertilizers be exempt from payment of such fees. It is hoped that through this measure, such cooperatives or associations will be encouraged to submit to the regulatory jurisdiction of the Fertilizer and Pesticide Authority.

For the above reasons, the passage of this bill is earnestly requested.
