**AN ACT**  
**MODERNIZING HEALTHCARE AND HEALTH INFRASTRUCTURE,**  
**PROVIDING FUNDS FROM THE ANNUAL VALUE-ADDED TAX COLLECTIONS,**  
**AMENDING FOR THE PURPOSE THE NATIONAL INTERNAL REVENUE CODE**  
**OF 1997, AS AMENDED**

EXPLANATORY NOTE

The Philippines' health profile is typical of a middle developing country. Aside from increasing population, deteriorating environment and poor nutrition, one of the biggest factors responsible for the weak performance of the health sector is the inadequate and ineffective public spending for health.

The passage of Republic Act No. 11223 or the Universal Health Care (UHC) Act during the last Congress marks an era of health care system reforms. Among others, the UHC law intends to achieve an integrated and comprehensive approach to the health system, addressing both its demand and supply sides. It endeavors to make medicines and medical supplies as well as quality health care services available to all Filipinos at an affordable cost. It also puts premium on the prudent use of financial resources on programs and projects that can help prevent, control, and cure diseases.

This bill proposes to allocate ten percent (10%) of the annual Value-Added Tax (VAT) collections to augment the pool of funds to support the implementation of the UHC law, specifically for the expanded immunization program and the

modernization of facilities and equipment of rural health units, and public hospitals run by local government units and the Department of Health.

Additional funding support to expand the immunization program will help address the risk of infant mortality, and support our goal to reduce under-five mortality rate by 67%.

Rural health units and district hospitals exercise the first line of defense against sickness. Thus, this bill allocates VAT dividends to modernize public health facilities in areas that need most of the funding support - the fourth to sixth-class municipalities.

It also seeks to establish regional specialty hospitals without the use of loans, but instead earmark tax collections of government. Creation of these additional hospitals would unburden the specialty hospitals located in the National Capital Region. It would also allow patients who come from the provinces, and those who do not have the resources to combat orthopedic, heart, lung, and kidney diseases, immediate and more affordable hospital services without the need to travel long distance.

In light of the foregoing, immediate passage of this bill is earnestly sought.
