PANDAN, SEBASTE, CULASI AND TIBIAO IN THE PROVINCE OF
ANTIQUE AS AN ECOTOURISM ZONE TO ENCOURAGE THE
RESPONSIBLE AND SUSTAINABLE USE AS WELL AS FOR THE
PRESERVATION AND CONSERVATION OF THE NATURAL RESOURCES
FOUND THEREIN, APPROPRIATING FUNDS THEREFOR, AND FOR
OTHER PURPOSES**

EXPLANATORY NOTE

The people's right to a healthful ecology is enshrined in the Constitution of the Republic of the Philippines as stated in Section 16 of Article II which states, "The State shall protect and advance the right of the people to a balanced and healthful ecology in accord with the rhythm and harmony of nature." This Bill is a step in the fulfilment of that Constitutional mandate.

This bill seeks to declare the Northern Antique Protected Seascape and Landsape (NAPSL) composed of the towns of Libertad, Pandan, Sebaste, Culasi and Tibiao as an ecotourism zone. It will be a true protected area with the appropriate delineation and zoning in order to achieve a balance of various land and water resource uses such as protection, production and settlements and multi-use areas. The NAPSL shall also serve to provide Filipinos with the following United Nations Sustainable Development Goals: Goal 1. End poverty; Goal 2. Zero hunger; Goal 3. Good health and Well-being; Goal 6. Clean water and sanitation; Goal 11. Sustainable cities and communities.^[1]

The NAPSL hosts a rich biodiversity that provide food, clean water, clean air, space for recreation and adventure for its splendour and unspoiled beauty. It needs protection which can be carried out fully well by a Protected Area Management Board with jurisdiction straddling various municipalities. The bill strives to address developmental needs of the community while assigning great importance to the carrying capacity and rich biodiversity of the NAPSL which cannot be replaced readily or at all.

The NAPSL is highlighted by features and species that need protection. Among them are the Mag-aba Wetland, Pandan Bay, Bugang River, endemic mangrove species, beach forest trees and fauna such as the Philippine duck (*Anas Luzonica*).

This Bill aspires to create a sustainable ecological tourism zone in Antique. The persistent global trend to visit as many magnificent nature reserves around the world behooves us to establish mechanisms to protect these areas. This bill will make it doable to implement protection measures within the NAPSL while allowing appropriate activities for Filipinos to satisfy the need for food, potable water, raw materials for commercial and industrial purposes only within limits.

In view of the above, the immediate passage of this bill is earnestly sought.

JUAN MIGUEL F. ZUBIRI
