EXPLANATORY NOTE

The Constitution, Article 2, Section 13 provides that, "The State recognizes the vital role of the youth in nation-building and shall promote and protect their physical, moral, spiritual, intellectual, and social well-being x x x."

In Article 14, Section 2 (1), the Constitution also provides that, "The State shall establish, maintain, and support a complete, adequate, and integrated system of education relevant to the needs of the people and society x x x."

Studies have shown that when students receive career information at an early age, school involvement and school performance improve. Children may do better in school if they can see how education is connected to a successful career in the future.

Career awareness begins as soon as children are exposed to role models. Preschoolers love role-playing, mimicking what they know and admire. They "play" parent, teacher, firefighter, bus driver, police officer, doctor, etc. During the elementary school years, children become aware of their community and the roles and jobs that adults perform. In their adolescent years, they are able to make finer distinctions, connect educational achievement with career opportunities, and understand the process of career planning.

A career awareness program is the development of knowledge, skills, and attitudes through a planned program of learning experiences in education and training settings which will assist students to make informed decisions about their study and/or work options and enable effective participation in their working life.

Implementing career awareness programs provides the knowledge and experience necessary for making informed career decisions. Thus, this bill aims to equip students not just

with the skills of education and training, but also with the attitudes and knowledge that will enable them to achieve the fulfillment of independent, functional and healthy careers.
