S. No. 116

Introduced by Senator Aquilino Q. Pimentel, Jr.

EXPLANATORY NOTE

One of the investigations conducted by the committee on Accountability of Public Officers and Investigations, otherwise known as the Blue Ribbon Committee was the modus operandi of syndicates specializing in fraudulent registration and titling of land.

At the end of the investigation, the Committee concluded that the whole system of the land registration and titling of land is institutionally and intrinsically flawed. The syndicates, in cahoots with some government agencies, engage in this revolting scheme. This could be traced, among other things, from the fact that the records' management of the Land Registration Authority is seriously defective in that some people there had allowed the switching or tampering of important land documents, including land titles.

This bill seeks to create a land title insurance system that will protect owners of real estate against defects in their land titles and help maintain the integrity of the Torrens Title system, which is the foundation of ownership to real property.

This piece of legislation seeks to create a land title insurance system that will protect owners of real estate against defects in their land titles and help maintain the integrity of the Torrens Title system, which stabilizes the ownership of real property. It is the aim of this bill to restore the faith and reliance of the people on the integrity of land titles.

It is hoped that the title insurance system would help crush a growing cancer that has infected our system of land registration bringing back the public's lost faith and confidence in the Torrens System.

Hence the passage of this bill is earnestly requested.
