Senate Bill No. 709

INTRODUCED BY SEN. JINGGOY EJERCITO ESTRADA

EXPLANATORY NOTE

Republic Act 8047, otherwise known as the Book Industry Development Act of 1995, provides that, "It is hereby declared a policy of the State to promote the continuing development of the book publishing industry with the active participation of the private sector to ensure an adequate supply of affordable, quality-produced books not only for the domestic but also for the export market."

However, despite the passage of said law, shortages of quality textbooks and other educational materials are still among perennial problems besetting our students. One of the reasons for this is the frequent changes made in the rules for the formulation of educational curriculum everytime there is a change of administration and the consequent changes in the preparation of appropriate textbooks and related materials. This does not only nullify the developmental efforts during the preceeding administrators but also puts into vain the huge investments made for this purpose.

There is a consensus among the stakeholders that in order to truly come up with sufficient quality textbooks and related educational materials to respond to the requirements of our students in the public elementary and secondary schools, it would take at least six (6) to ten (10) years, composed of at least three (3) to five (5) years for research and study and another three (3) to five (5) years for implementation, to develop and adopt with the desired curriculum development.

This proposed measure seeks to remedy such situation by mandating that educational curriculum and the consequent preparation of textbooks and related educational materials should have continuity and stability and that the same should not be affected by any change during the period of at least six (6) years.

The early passage of this proposed measure is highly recommended.
