RECEIVED BY: 

S No. 814

Introduced by Senator Ramon Bong Revilla, Jr.

EXPLANATORY NOTE

The purpose of the Public Land Act of 1936 was to distribute land to the people for their economic well-being. During that time, the country's population was relatively low in proportion to vast land resources. Present conditions have rendered this law inadequate to the demands of growing population and the present strategy of developing the country's natural resources. Moreover, the tenurial system espoused by the Public Land Act has been outpaced by developments related to the protection of the environment.

The need to update our land laws can no longer be postponed. This proposed Revised Public Land Act of the Philippines seeks to do just that: it seeks to underscore the ecological and conservation aspects of land development, and gives due recognition to the role of indigenous cultural communities (ICCs). The stewardship concept of landholding has also been incorporated in this Act, underscoring the responsibility of those who possess the land.

The coverage of this Act includes agricultural lands and those for non-forestry use, ancestral lands, friar lands and those not under the jurisdiction of any government agency.

Approval of this Bill is earnestly sought.
