EXPLANATORY NOTE

The medical profession is one of the most prestigious professions. Given that the profession deals with life and health, there is a need to regulate the profession to ensure the quality of service given to the people. Considering the number of doctors situated in the different provinces all over the country, there is a need to allow the profession to self-regulate, similar to the legal profession. However, unlike the legal profession, there is no integrated medical professional organization.

What currently exists is the Philippine Medical Association, Inc. (PMA) which is the umbrella organization of the medical profession of the country. It is duly registered with the Securities and Exchange Commission as a non-stock, non-profit organization and is the mother association of all medical organizations in the Philippines. It was founded September 15, 1903, at a time when the country was under the American rule.

The Philippine Medical Association brings together the entire medical profession under one roof to serve as an authoritative source of information on health, disease and medical practice. It is responsible for the Training of Specialists through its Specialty Societies. It is responsible for the sustained excellent quality healthcare delivery through its continuing medical education, formulation of clinical practices, guidelines, directly or through the specialty societies. It polices its ranks through the rigid Code of Ethics of the medical profession.

Aside from its by-laws, duly registered with the Securities and Exchange Commission, the PMA has codes governing its affairs and the conduct of its members. Among its codes are the Administrative Code, the Code on Continuing Medical Education, Code of Ethics, the Election Code and Mutual Aid Code and Guidelines on Protocol and Procedures and Guidelines on Affiliate Societies.

Given the need for an integrated medical professional organization and the breadth, composition, membership and nationwide coverage of the PMA, this bill seeks to accredit the PMA as the integrated medical professional organization in the Philippines and all physicians wanting to practice medicine will be required to become members of the PMA. If the bill is passed into law, we will be creating a professional medical organization already in place that can serve as an extension of the government in regulating the medical profession, maintaining the high and ethical conduct of the medical professionals and help in the continued delivery of quality health care.

The immediate approval of this bill is recommended.
