SENATE
S.B. No. 1099

RECEIVED BY: _____

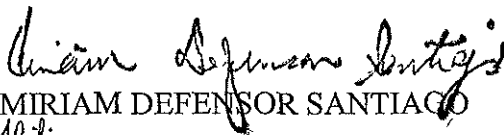

Introduced by Senator Miriam Defensor Santiago

EXPLANATORY NOTE

Unintentional injuries are the leading cause of death among children. In the United States, as of March 2007, an average of 50 children under the age of 5 die each year in incidents associated with nursery products, and about 16 of these deaths each year are associated with cribs.

In 2003, an estimated 60,700 children under the age of 5 were treated in United States hospital emergency rooms for injuries associated with nursery products, and there were 10,700 injuries to children under the age of 5 years associated with strollers alone.

Here in the Philippines, we lack product standards to protect our toddlers and infants from similar incident. This bill seeks to direct the Department of Trade and Industry to promulgate a consumer product safety standard for each durable infant or toddler product.*

MIRIAM DEFENSOR SANTIAGO
